## **Designing The New World:**

Going Real: The Value of Design in the Era of PostCapitalism Giovanni Innella, Marco Petroni, 2019-10-31 In the age of post capitalism what is the value of design Is value defined by economic potential Or is it something far less tangible Now more than ever design has the ability to engage us in economic political and cultural debate to actively resist the monotony of daily life and to counteract the precarious situation on which modern society seems to rest Positioning itself as a lens through which to view the world design allows us and in some cases even forces us to reflect on the many aspects of the societies in which we live Divided into three chapters GOING REAL positions itself in relation to the works of Marc Jongen Maurizio Lazzarato Adam Greenfield and Tiziana Terranova among others However unlike the abovementioned authors this book draws on the works of selected designers and artists to reflect on the economic political and cultural aspects of our post capitalist societies Beginning with an in depth case study of Detroit during the downfall of the industrial era this volume moves on to a timely and provocative insight into the human crises surrounding current migration trends with a particular focus on Calais Finally in the third chapter the human body itself is laid bare as the authors analyse how and why the most personal of spaces became not only the ultimate marketplace for businesses but also an object of control for governments

**Fundamentals of Integrated Design for Sustainable Building** Marian Keeler, Bill Burke, 2013-05-28 Fundamentals of Integrated Design for Sustainable Building offers an introduction to green building concepts as well as design approaches that reduce and can eventually eliminate the need for fossil fuel use in buildings while also conserving materials maximizing their efficiency protecting the indoor air from chemical intrusion and reducing the introduction of toxic materials into the environment It represents a necessary road map to the future designers builders and planners of a post carbon world from the Foreword by Ed Mazria A rich sourcebook covering the breadth of environmental building Fundamentals of Integrated Design for Sustainable Building introduces the student and practitioner to the history theory and technology of green building Using an active learning approach the concepts of sustainable architecture are explained and reinforced through design problems research exercises study questions team projects and discussion topics Chapters by specialists in the green movement round out this survey of all the important issues and developments that students and professionals need to know From history and philosophy to design technologies and practice this sweeping resource is sure to be referenced until worn out

The Culture of Design Guy Julier, 2012-06-21 Praise for the first edition Julier provides an important contemporary account of how design disciplines act and interact in the world an important resource for the student of design perfection as a cultural studies text European Journal of Cultural Studies Aimed at students of design studies design history cultural studies and sociology The Culture of Design offers a unique overview of design practice in contemporary culture and society Drawing on a range of theoretical perspectives Julier nevertheless foregrounds the everyday business and professional context in which designers work The second edition of The Culture of Design has been thoroughly revised and updated and

contains new case studies including one on the iPod In addition the book now has a new introductory chapter that outlines academic approaches to design culture and an extended final chapter which looks at the links between design and management studies and how the creative industries function in the context of urban regeneration and social participation

**Metadesigning Designing in the Anthropocene** John Wood,2022-06-08 Long sighted radical and provocative this book offers a foundational framework of concepts principles and methods exemplified with selected tools to enable metadesigners to manage and reinvent their practices The book reminds readers that designers are albeit unwittingly helping to shape the Anthropocene Despite their willingness to deliver greener products and services designers find themselves part of an industry that has become the go to catalyst for dividends and profit If our species is to achieve the rehabilitation and metamorphosis we may need to design at the level of paradigms genres lifestyles and currencies This would mean making design more integrated comprehensive adaptive transdisciplinary self reflexive and relational The book therefore advocates a shift of emphasis from designing sustainable products services and systems towards cultivating synergies that will induce regenerative lifestyles The book will be of interest to managers designers scholars and educators from a wide range of backgrounds including design research design history design studies and environmental studies
