Design And Implementation Of A Log Structured File System:

The Design and Implementation of a Log-structured File System Mendel Rosenblum, 1992 I have implemented a prototype log structured file system called Sprite LFS it outperforms current Unix file systems by an order of magnitude for small file writes and matches or exceeds Unix performance for reads and large writes Even when the overhead for cleaning is included Sprite LFS can use 70% of the disk bandwidth for writing Unix file systems typically can use only 5 10%

Gatwood, 2001 **Secure Cloud Computing** Sushil Jajodia, Krishna Kant, Pierangela Samarati, Anoop Singhal, Vipin Swarup, Cliff Wang, 2014-01-23 This book presents a range of cloud computing security challenges and promising solution paths The first two chapters focus on practical considerations of cloud computing In Chapter 1 Chandramouli Iorga and Chokani describe the evolution of cloud computing and the current state of practice followed by the challenges of cryptographic key management in the cloud In Chapter 2 Chen and Sion present a dollar cost model of cloud computing and explore the economic viability of cloud computing with and without security mechanisms involving cryptographic mechanisms The next two chapters address security issues of the cloud infrastructure In Chapter 3 Szefer and Lee describe a hardware enhanced security architecture that protects the confidentiality and integrity of a virtual

machine's memory from an untrusted or malicious hypervisor In Chapter 4 Tsugawa et al discuss the security issues introduced when Software Defined Networking SDN is deployed within and across clouds Chapters 5-9 focus on the protection of data stored in the cloud In Chapter 5 Wang et al present two storage isolation schemes that enable cloud users with high security requirements to verify that their disk storage is isolated from some or all other users without any cooperation from cloud service providers In Chapter 6 De Capitani di Vimercati Foresti and Samarati describe emerging approaches for protecting data stored externally and for enforcing fine grained and selective accesses on them and illustrate how the combination of these approaches can introduce new privacy risks In Chapter 7 Le Kant and Jajodia explore data access challenges in collaborative enterprise computing environments where multiple parties formulate their own authorization rules and discuss the problems of rule consistency enforcement and dynamic updates In Chapter 8 Smith et al address key challenges to the practical realization of a system that supports query execution over remote encrypted data without exposing decryption keys or plaintext at the server In Chapter 9 Sun et al provide an overview of secure search techniques over encrypted data and then elaborate on a scheme that can achieve privacy preserving multi keyword text search The next three chapters focus on the secure deployment of computations to the cloud In Chapter 10 Oktay et al present a risk based approach for workload partitioning in hybrid clouds that selectively outsources data and computation based on their level of sensitivity The chapter also describes a vulnerability assessment framework for cloud computing environments In Chapter 11 Albanese et al present a solution for deploying a mission in the cloud while minimizing the mission's exposure to known vulnerabilities and a cost effective approach to harden the computational resources selected to support the mission In Chapter 12 Kontaxis et al describe a system that generates computational decoys to introduce uncertainty and deceive adversaries as to which data and computation is legitimate The last section of the book addresses issues related to security monitoring and system resilience In Chapter 13 Zhou presents a secure provenance based capability that captures dependencies between system states tracks state changes over time and that answers attribution questions about the existence or change of a system's state at a given time In Chapter 14 Wu et al present a monitoring capability for multicore architectures that runs monitoring threads concurrently with user or kernel code to constantly check for security violations Finally in Chapter 15 Hasan Cam describes how to manage the risk and resilience of cyber physical systems by employing controllability and observability techniques for linear and non linear systems
