This sets the stage for the book's coverage of the day-to-day issues of environmentally responsible interior design, including indoor air quality, environmentally responsible lighting design, energy and water issues, evaluation and specification of interior finishes and furnishings, United States Green Building Council and LEED certification. The author sets forth and examines a variety of essential design standards and philosophies, including LEED CI, William McDonough's Cradle to Cradle, Minnesota Sustainable Design Guide, and Energy Star. The final part of the book is dedicated to two in-depth case studies that demonstrate how the principles and practices discussed in the book have been successfully put into action. Throughout the presentation, detailed illustrations enable you to better understand how environmentally responsible design works. A bibliography at the end of the book leads you to additional resources.
