and future I highly recommend this book Army Magazine Pendry's book is both timely and useful I encourage all battalion and brigade commanders to add it to their unit's professional reading list Read this book take up his challenge to critically examine ourselves and our styles Armor Magazine J D Pendry does a superb job of relating his own personal experiences and tying them into everyday leadership and management principles It is not too difficult to transfer the lessons presented here to any other military service or civilian application U S Naval Institute Proceedings Business and corporate leaders would do well to take Pendry's lessons to heart Ocala Florida Star Banner *Changing Minds in the Army* Stephen J. Gerras, Leonard Wong, 2013 In a time of extraordinary fiscal and national security uncertainty it seems naive to assume that all or even most of a strategic leader's current assumptions will be just as relevant several years into the future This monograph highlights the need for Army senior leaders in the midst of change to periodically question their deep seated beliefs on critical issues and perhaps change their minds rather than relying solely on what they have long believed to be true Common Sense Training Lt. Gen. Arthur S. Collins, Jr., 2011-04-06 Leadership is so much a part of the conduct of training that at times it is difficult to tell where one stops and the other starts The best book on military training from platoon to division level that has been published in any army Army magazine His message is that whatever works and gets results by the most direct and efficient means is good All else should be eliminated Air University Review A utilitarian book that talks intelligently of leadership management and common sense ARMOR magazine A hardhitting and unvarnished authoritative work that should be read and reread by everyone who aspires to be a truly professional soldier General Bruce Palmer U S Army Ret A gem with few peers invaluable Arthur Collins advice is always performance oriented Don't talk so much about it he says Don't make so many fancy charts about training Instead do it Teach it Perform it Parameters
