Integrated Global Models of Sustainable Development - Volume III Akira Onishi, 2009-08-18 Integrated Global Models of Sustainable Development is a component of Encyclopedia of Technology Information and Systems Management Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty-one Encyclopedias. In the 21st century the human society is facing the challenge of sustainable development with constraints of global environmental changes. In order to cope with poverty and international per capita income disparity IPCID there should be further needs for economic development to provide employment opportunities against Terrorism and refugees. The coverage in three volumes tries to show a possibility of sustainable development from a global viewpoint by using alternative policy simulations. The chapters are organized so that the readers might understand archived historical trends in global modeling for sustainable development. Starting from global models in the 1970s 1980s 1990s the updated latest modeling works are also included as far as possible. The chapters deal with roles of integrated global models scope and methodologies and policy implications. These three volumes are aimed at the following five major target audiences: University and College students, Educators, Professional practitioners, Research personnel and Policy analysts, managers and decision makers and NGOs. *Thông báo sách mới*, 2009.
