replaced three years later by a presidential system under a unified Nationalist government in Nanjing. The cabinet government was restored in 1931 and existed until the presidential system was again installed by the 1936 constitution. Why did presidential and cabinet systems exist alternately during this formative period of the Nationalist government? Why was the presidential system finally adopted in 1936? Suisheng Zhao answers these and other questions fundamental to understanding authoritarian regimes in this pioneering study of the design of the Nationalist Government of China from 1925 to 1937. Although scholars of comparative politics have shown great interest in the institutional choice between parliamentarism and presidentialism in democratic countries, they have paid little attention to the study of constitutional frameworks in authoritarian settings. By offering a clear and original re-interpretation of the history of this power struggle between Chiang Kai-shek and his rivals over institutional design, Zhao challenges the conventional wisdom that has underestimated the importance of formal institutions in non-democratic regimes. Borrowing ideas from public choice theory, Zhao proposes that political actors who design governmental institutions are driven by power maximization strategies, just as business firms are driven by wealth maximization strategies. Constitution making reflects the underlying distribution of power among authoritarian leaders who attempt to design political institutions that will consolidate their personal power and position. Thus, Zhao argues, if political actors possess more power resources than their rivals and anticipate themselves becoming dominant, they will choose the singular leadership of the presidential system. If they are in a weaker position and do not anticipate becoming dominant, they will prefer the collective leadership of the cabinet form of government. Notable for its persuasive integration of political science theory and the historical evidence, *Power by Design* is an insightful re-interpretation of Chinese history that will be welcomed by scholars of modern China and those interested in the consequences of the nationalist politics that continue to reverberate in contemporary China, as well as by comparative political scientists studying constitution making and institutional design.

Democratization in China, Korea and Southeast Asia? Kate Xiao Zhou, Shelley Rigger, Lynn T. White III, 2014-01-21. Rapid economic pluralization in East Asia has empowered local and medial groups, and with this change comes the need to rethink usual notions regarding ways in which democracies emerge or citizens gain more power. Careful examination of current developments in China, Korea, and Southeast Asia shows a need for expansion of our understandings of democracy and democratization. This book challenges traditional ways in which political regimes in local as well as national polities are conceived and labeled. It shows from Asian experiences that democracy and its precursors come in more forms than most liberals have yet imagined. In reviewing recent experiences of countries across East Asia, these chapters show that actual democracies and ostensible democratizations there are less like those in the West than the surprisingly consensual and standard political science of democratization suggests. This book first examines the extreme variation of democracy's meaning in many Asian states that hold contested elections: South Korea, Taiwan, Indonesia, Malaysia, the Philippines, and Thailand. Then it focuses on China. It analyzes a range of grassroots forces

driving political change in the People's Republic and it finds both accelerators and brakes in China's political reform process. The contributors show that models for China's political future exist both within and outside the PRC including in other East Asian states in localities and sectors that already are pushing the limits of the powerful but no longer all-powerful Chinese party state. With contributions from leading academics in the field, Democratization in China, Korea, and Southeast Asia will be of interest to students and scholars of Asian politics, comparative politics, and democratization more broadly.
