Harkness, Fons J. R. van de Vijver, Peter Ph. Mohler, 2003 Table of contents **Institutions, Mobilisation, and Political Participation** Laura Morales Diez de Ulzurrun, 2004 Esta tesis mantiene que no podemos entender completamente el asociacionismo político de los ciudadanos a menos que fijemos nuestra mirada más allá de las características individuales es decir a menos que intentemos comprender qué efecto tiene sobre su comportamiento político el contexto político y social en el que los ciudadanos actúan Los recursos y las características socioeconómicas proporcionan oportunidades para unirse a organizaciones políticas Las actitudes y las orientaciones proveen o por el contrario reducen la motivación para unirse a un grupo con objetivos políticos Sin embargo estos rasgos individuales no son necesariamente factores de desigualdad en todas las sociedades ni tienen siempre las mismas consecuencias El contexto social y político en el que los ciudadanos toman decisiones sobre su participación interactúa de manera importante con los rasgos individuales para activar o desactivar su impacto político Además el contexto social y político que rodea a los ciudadanos tiene también un impacto independiente sobre su comportamiento político Las instituciones políticas y las pautas de movilización política condicionan de manera crucial el asociacionismo político Estos dos conjuntos de factores instituciones y movilización estructuran las oportunidades de participación que en realidad tienen los ciudadanos De hecho algunos sistemas democráticos han desarrollado instituciones políticas que facilitan la pertenencia a grupos políticos Así mientras que en algunos países occidentales los ciudadanos son movilizados con mucha frecuencia a través de asociaciones políticas en otros lo son en mucha menor medida Esta tesis es por lo tanto un intento de incorporar de una manera sistemática la política y las instituciones en el análisis del comportamiento político A lo largo de la misma se demuestra que las enormes diferencias entre los países occidentales en términos de la propensión de sus respectivos ciudadanos a organizarse políticamente no pueden explicarse sólo por las distintas características socioeconómicas de los individuos Sin duda estos aspectos también contribuyen a que sean menos participativos pero no nos ayudan gran cosa a explicar las variaciones que encontramos entre sociedades occidentales Los resultados de esta investigación ponen de manifiesto la enorme importancia del contexto sociopolítico para explicar por qué los ciudadanos de algunas democracias occidentales participan en política a través de organizaciones y por qué no lo hacen los de otras sociedades similares Determinadas estructuras de oportunidades políticas favorecen la participación de los ciudadanos de manera muy importante Así sistemas políticos más abiertos a la influencia de las organizaciones políticas gracias a la

existencia de arreglos corporativistas de intermediación de intereses y al mayor pluralismo y fragmentación de la representación parlamentaria contribuyen a que los ciudadanos encuentren mayores incentivos para participar en los asuntos públicos. Del mismo modo el grado en que las propias organizaciones políticas actúan como agentes efectivos de movilización política influye en el comportamiento participativo de los ciudadanos. Allí donde las organizaciones políticas tienen una red organizativa y de infraestructuras más densas los ciudadanos están más expuestos a los estímulos de reclutamiento político y por tanto participan más. Además el contexto político no solo estructura las oportunidades de participación de los ciudadanos sino que también interactúa con las características de los propios ciudadanos contribuyendo a aumentar o disminuir las desigualdades participativas de los mismos. Las estructuras políticas más abiertas y accesibles disminuyen las barreras y los costes a la participación de tal manera que los individuos con menores recursos socioeconómicos por ejemplo la educación no se encuentran tan desfavorecidos en su capacidad de influir en el proceso de toma de decisiones. Por el contrario las estructuras políticas más cerradas exacerbaban el efecto de las desigualdades sociales y las transforman en desigualdades políticas. De esta manera el contexto político tiene un doble efecto sobre el asociacionismo político en las democracias occidentales. Por un lado condiciona cuánta gente participa en los asuntos públicos a través de organizaciones políticas y por otro incide en quiénes son los que participan. Los sistemas políticos más abiertos extienden e igualan la participación organizada de los ciudadanos los sistemas políticos más cerrados reducen la participación y la hacen más desigual socialmente.

The SAGE Handbook of Social Research Methods Pertti Alasuutari, Leonard Bickman, Julia Brannen, 2008-02-25 The SAGE Handbook of Social Research Methods is a must for every social science researcher. It charts the new and evolving terrain of social research methodology covering qualitative, quantitative and mixed methods in one volume. The Handbook includes chapters on each phase of the research process: research design, methods of data collection and the processes of analyzing and interpreting data. The volume maintains that there is much more to research than learning skills and techniques; methodology involves the fit between theory, research questions, research design and analysis. The book also includes several chapters that describe historical and current directions in social research, debating crucial subjects such as qualitative versus quantitative paradigms, how to judge the credibility of types of research and the increasingly topical issue of research ethics. The Handbook serves as an invaluable resource for approaching research with an open mind. This volume maps the field of social research methods using an approach that will prove valuable for both students and researchers.
