## **Comparing Environmental Risks Tools For Setting Government Priorities:**

**Comparing Environmental Risks** J. Clarence Davies, 2014-04-04 The budgetary squeeze of the 1990s has made it obvious that the government cannot address every possible environmental problem Comparative risk assessment CRA is increasingly advanced as the means for setting realistic priorities RFF's Center for Risk Management commissioned background papers from leading experts on CRA for a meeting with federal regulatory officials Comparing Environmental Risks presents the revised papers of this workshop Representing the state of the art on programmatic CRA its methodological analyses and practical recommendations will be invaluable to government officials independent analysts and anyone studying environmental policy

**Comparative Risk Assessment and Environmental Decision Making** Igor Linkov, Abou Bakr Ramadan, 2006-03-02 Decision making in environmental projects is typically a complex and confusing process characterized by trade offs between socio political environmental and economic impacts Comparative Risk Assessment CRA is a methodology applied to facilitate decision making when various activities compete for limited resources CRA has become an increasingly accepted research tool and has helped to characterize environmental profiles and priorities on the regional and national level CRA may be considered as part of the more general but as yet quite academic field of multi criteria decision analysis MCDA Considerable research in the area of MCDA has made available methods for applying scientific decision theoretical approaches to multi criteria problems but its applications especially in environmental areas are still limited The papers show that the use of comparative risk assessment can provide the scientific basis for environmentally sound and cost efficient policies strategies and solutions to our environmental challenges

Scientific Review of the Proposed Risk Assessment Bulletin from the Office of Management and Budget National Research Council, Division on Earth and Life Studies, Board on Environmental Studies and Toxicology, Committee to Review the OMB Risk Assessment Bulletin, 2007-05-16 Risk assessments are often used by the federal government to estimate the risk the public may face from such things as exposure to a chemical or the potential failure of an engineered structure and they underlie many regulatory decisions Last January the White House Office of Management and Budget OMB issued a draft bulletin for all federal agencies which included a new definition of risk assessment and proposed standards aimed at improving federal risk assessments This National Research Council report written at the request of OMB evaluates the draft bulletin and supports its overall goals of improving the quality of risk assessments However the report concludes that the draft bulletin is fundamentally flawed from a scientific and technical standpoint and should be withdrawn Problems include an overly broad definition of risk assessment in conflict with long established concepts and practices and an overly narrow definition of adverse health effects one that considers only clinically apparent effects to be adverse ignoring other biological changes that could lead to health effects The report also criticizes the draft bulletin for focusing mainly on human health risk assessments while neglecting assessments of technology and engineered structures

Environmental Burden of Disease Assessment Jacqueline MacDonald

Gibson,Angela Brammer,Christopher Davidson,Tiina Folley,Frederic Launay,Jens Thomsen,2013-02-12 This publication characterizes the environmental burden of disease in the United Arab Emirates UAE measured by the excess number of deaths and illnesses in the population due to exposure to environmental hazards The robust methods used in this risk analysis can be applied to any country or region This publication documents the systematic multi step process used to identify environmental priorities and the detailed methods used to quantify the disease burden attributable to each risk Based on the results of the burden of disease assessment the publication summarizes the subsequent steps that are recommended to further reduce the burden of disease resulting from various environmental risk factors Authors and Contributors This book represents the synthesis of research carried out by a large interdisciplinary team from several institutions and multiple nations between June 2008 and June 2011 The lead authors are responsible for weaving together the pieces prepared by the team Nonetheless this book would not have been possible without major contributions from each team member The list below shows contributors to each chapter Following this list are biographies of all of the authors and contributors Lead Authors Jacqueline MacDonald Gibson Frederic J P Launay Jens T W Thomsen Angela Brammer Christopher Davidson Additional Contributors by Chapter Chapter 2 Prioritizing Environmental Risks to Health Henry H Willis Aimee Curtright Gary Cecchine Zeinab S Farah Sandra A Geschwind Jianhui Hu Ying Li Melinda Moore Sarah Olmstead Hanine Salem Regina A Shih J Jason West Chapter 3 Assessing the Environmental Burden of Disease Method Overview Tiina Folley Elizabeth S Harder Mejs Hasan Chapter 4 Burden of Disease from Outdoor Air Pollution Ying Li Gavino Puggioni Prahlad Jat Mejs Hasan Marc Serre Kenneth G Sexton J Jason West Saravanan Arunachalam Uma Shankar William Vizuete Mohammed Zuber Farooqui Chapter 5 Burden of Disease from Indoor Air Pollution Chris B Trent Chapter 6 Burden of Disease from Occupational Exposures Tiina Folley Leena A Nylander French Chapter 7 Burden of Disease from Climate Change Richard N L Andrews Leslie Chinery Elizabeth S Harder J Jason West Chapter 8 Burden of Disease from Drinking Water Contamination Gregory W Characklis Joseph N LoBuglio Chapter 9 Burden of Disease from Coastal Water Pollution Gregory W Characklis Leigh Anne H Krometis Joseph N LoBuglio Chapter 10 Burden of Disease from Soil and Groundwater Contamination Chidsanuphong Chart asa Stephanie Soucheray Grell Chapter 11 Burden of Disease from Produce and Seafood Contamination Leigh Anne H Krometis Leslie Chinery

**Environmental Health Policy** David Ball,2006-12-16 Understanding Public Health Series Editors Nick Black and Rosalind Raine There is an increasing global awareness of the inevitable limits of individual health care and of the need to complement such services with effective public health strategies Understanding Public Health is an innovative series of twenty books published by Open University Press in collaboration with the London School of Hygiene and Tropical Medicine It provides self directed learning covering the major issues in public health affecting low middle and high income countries The series is aimed at those studying public health either by distance learning or more traditional methods as well as public health practitioners and policy makers ENVIRONMENTAL HEALTH

POLICY Environmental health policy occupies a prominent position on both local and global agendas as old and new challenges confront the human race There is a continual requirement for policies which will deal effectively with a seemingly never ending supply of hazards which impinge on health and wellbeing This book provides a multidisciplinary window onto environmental policy and its formulation From this you will observe both order which exists at the centre and controversies around the borders This book considers Key threats to human health from the physical environment Policies that might be pursued to minimise those risks How risks can be identified and quantified How such information can be communicated to the public How health impact assessments can be carried out How risks can be managed and regulated

*Improving Regulation* Paul S. Fischbeck, R. Scott Farrow, 2010-09-30 Is there potential for a U S regulatory system that is more efficient and effective Or is the future likely to involve paralysis by analysis *Improving Regulation* considers the challenges faced by the regulatory system as society and technology change and our knowledge about the effects of our activities on human and planetary health becomes more sophisticated While considering the difficulty in linking regulatory design and performance *Improving Regulation* makes the case for empowering regulatory analysis Studying applications as diverse as fire protection air and water pollution and genetics its contributors examine the strategies of different stakeholders in today s complex policymaking environment With a focus on the behavior of institutions and people they consider the impact that organizational politics science technology and performance have on regulation They explore the role of technology in creating and reducing uncertainty the costs of control the potential involvement of previously unregulated sectors and the contentious public debates about fairness and participation in regulatory policy Arguing that the success of many regulations depends upon their acceptance by the public Fischbeck Farrow and their contributors offer extensive inductive evidence on the art of regulatory analysis The resulting book provides real world examples of regulation and a demonstration of how to synthesize analytical skills with a knowledge of physical and social processes

*Better Environmental Decisions* Ken Sexton, 1999 *Better Environmental Decisions* brings together leading scholars and practitioners from business government and communities to provide a comprehensive interdisciplinary introduction to the new landscape of environmental regulation and agreements Each chapter describes an important aspect of environmental decision making identifies key issues problems and barriers and recommends ways to improve both the process and the final result Throughout contributors focus on providing tools to make better decisions and on presenting solutions to real world problems This useful work will be a landmark reference and text for scholars and students as well as legislators regulators advocates and community activists

**Resources**, 2001 *The Consumer's Guide to Effective Environmental Choices* Michael Brower, Warren Leon, 1999 From one of the most prestigious nonprofit organizations devoted to environmental issues comes a clear practical and rational overview of the relationship between consumers and the environment Paper or plastic Bus or car Old house or new Cloth diapers or disposables Some choices have a huge impact on the environment others are of negligible importance To

those of us who care about our quality of life and what is happening to the earth this is a vastly important issue In these pages the Union of Concerned Scientists help inform consumers about everyday decisions that significantly affect the environment For example a few major decisions such as the choice of a house or vehicle have such a disproportionately large affect on the environment that minor environmental infractions shrink by comparison This book identifies the 4 Most Significant Consumer Related Environmental Problems the 7 Most Damaging Spending Categories 11 Priority Actions and 7 Rules for Responsible Consumption Learn what you can do to have a truly significant impact on our world from the people who are at the forefront of scientific research

**Risk** ,2001 Environmental Policy Norman J. Vig,Michael E. Kraft,1999 Contains 17 contributions written by American professors of political science economics law environmental studies and other fields organized into five sections environmental policy and changing US environmental politics the role of federal institutions in environmental policymaking dilemmas in environmental policy formulation and implementation global and domestic issues and controversies and a conclusion defining an agenda of major environmental issues and new policymaking approaches

*The Journal of Energy and Development* ,1996 The Greening of Industry John David Graham,Jennifer Kassalow Hartwell,1997 The risk management approach to environmental and public health policy is often perceived by environmentalists as a tool to block regulation of industrial pollution In *The Greening of Industry A Risk Management Approach* John D Graham Jennifer Kassalow Hartwell and their colleagues at the Harvard Center for Risk Analysis present six case studies which provide examples of how federal risk based regulation has influenced industry s investment in pollution prevention and control The authors trace the impact of risk management on the regulation of lead in gasoline ozone depleting chemicals and emissions from the dry cleaning pulp and paper coke and municipal waste combustor industries Using these case studies as raw material the final chapter assesses the role risk management has played in industry s environmental decisions and proposes steps that may be taken to further its contribution to achieving environmental goals
