Making Strategies in Spatial Planning Maria Cerreta, Grazia Concilio, Valeria Monno, 2010-09-11 This provocative collection of essays challenges traditional ideas of strategic spatial planning and opens up new avenues of analysis and research. The diversity of contributions here suggests that we need to rethink spatial planning in several far-reaching ways. Let me suggest several avenues of such rethinking that can have both theoretical and practical consequences. First we need to overcome simplistic bifurcations or dichotomies of assessing outcomes and processes separately from one another. To lapse into the nostalgia of imagining that outcome analysis can exhaust strategic planners' work might appeal to academics' content to study what should be but it will doom itself to further irrelevance. Ignorance of politics and rationalistic technocratic fantasies. But to lapse into an optimism that good process is all that strategic planning requires similarly rests upon a fiction that no credible planning analyst believes that enough talk will miraculously transcend conflict and produce agreement. Neither a single-minded approach can work for both avoid dealing with conflict and power and both too easily avoid dealing with the messiness and the practicalities of negotiating out conflicting interests and values and doing so in ethically and politically critical ways far from resting content with mere compromise. Second we must rethink the sanctity of expertise. By considering analyses of planning outcomes as inseparable from planning processes these accounts help us to see expertise and substantive analysis as being on tap ready to put into use rather than being particularly and technocratically on top.

Governing Cities in a Global Era R. Hambleton, 2007-11-26 This book is about the role that ideas, institutions and actors play in structuring how we govern cities and more specifically what projects or paths are taken. Global changes require that we rethink governance and urban policy and that we do so through the dual lens of theory and practice.

Politics and the Environment James Connelly, Graham Smith, David Benson, Clare Saunders, 2012-03-15 *Politics and the Environment* has established itself as one of the most comprehensive textbooks in this area. This new edition has been completely revised and updated whilst retaining the features and the theory to practice focus which made the first two editions so successful. This text is designed to introduce students to the key concepts and issues which surround environmental problems and their political solutions. The authors investigate the people, movements and organisations that form and implement these policies and explore the barriers which hinder successful introduction of international environmental politics. The 3rd edition has been expanded to include the shift in focus in environmental politics from sustainable development to climate change governance. An extensive discussion on climate change including institutional, national and global responses in the aftermath of the Kyoto protocol. An increased international focus with more case studies from the UK, Europe, Australia and North America. More discussion of global environmental social movements including the US environmental organisations in particular the Green Party and the environmental justice groups. This textbook is an invaluable and accessible resource for undergraduates studying environmental politics.
