Ascertainment under Civil Law Santo Davide Ferrara,Rafael Boscolo-Berto,Guido Viel,2016-10-06 This volume serves to  
provide an international overview of personal injury compensation in different geographical areas 15 countries already  
included with a special focus on the methods used to ascertain the injury and the related damages It also goes on to clarify  
the logical and methodological steps required for a sequential in depth ascertainment of any traumatic event and the related  
personal damage both pecuniary and non pecuniary Personal injury is a legal term for an injury to the body mind or emotions  
suffered by the plaintiff under tort and or civil law regulations Damages related to the injury can be pecuniary or non  
pecuniary in nature Although several comparative studies and research projects on tort and civil law and personal injury  
claims aimed at developing new tools for promoting harmonization of private law have been performed at an international  
level heterogeneity and divergences still exist in the definition and compensation of personal injury and damage across  
different national legislative systems The starting point for any awarding procedure should be a medical or rather a medico  
legal assessment to gain evidence on the trauma or event causing the injury the mechanism of injury the pre existing health  
status of the injured party and the health consequences of the injury temporary and permanent impairment work incapacity  
etc In order to pursue the ultimate goal of an international harmonization of personal injury compensation it is of utmost  
importance to define the quality requirements for the medico legal ascertainment methodology which are essential for  
guaranteeing the objectivity rigor and reproducibility of the data and the evidence collection procedure Currently there are  
no supra national medico legal guidelines dealing with the ascertainment methodology of personal injury and damage under
