Competition Policy Theory And Practice:

Competition Policy Massimo Motta, 2004-01-12 This is the first book to provide a systematic treatment of the economics of antitrust or competition policy in a global context It draws on the literature of industrial organisation and on original analyses to deal with such important issues as cartels joint ventures mergers vertical contracts predatory pricing exclusionary practices and price discrimination and to formulate policy implications on these issues The interaction between theory and practice is one of the main features of the book which contains frequent references to competition policy cases and a few fully developed case studies The treatment is written to appeal to practitioners and students to lawyers and economists It is not only a textbook in economics for first year graduate or advanced undergraduate courses but also a book for all those who wish to understand competition issues in a clear and rigorous way Exercises and some solved problems are provided

Competition Policy Massimo Motta, 2004-01-12 Offering a complete analysis of antitrust or competition policy issues this study is enhanced by frequent references to antitrust cases and a few fully developed case studies Although it can be used as an economics textbook in graduate or advanced undergraduate courses the book is equally accessible to lawyers practitioners and readers interested in antitrust issues but unfamiliar with modern economics Technical explanations of material are relegated to separate technical sections that can be skipped without losing continuity

The Law and Economics of Article 102 TFEU Robert O'Donoghue KC, Jorge Padilla, 2020-09-03 Jointly authored by a lawyer and an economist this is a comprehensive integrated treatment of the legal and economic principles that underpin the application of Article 102 TFEU to the behaviour of dominant firms

Competitive Advantage and Competition Policy in Developing Countries Paul Cook, Raul V. Fabella, Cassey Lee, 2007 Competitive markets are now established in most successful economies but the question of what competition is and what it means for policy in developing countries is often overlooked This book provides a refreshing and critical examination of the issues relating to market competition and competition policy The book discusses competition from different theoretical perspectives and examines the implications these viewpoints have for policy The contributors assess competitiveness in domestic markets and the impact of foreign competition They also review the experiences of a range of countries in developing competition policy and examine both the strengths and weaknesses of these policies Written in a non technical manner Competitive Advantage and Competition Policy in Developing Countries is addressed to policymakers as well as academics concerned with regulation and competition It will also be of interest to regulators in dedicated agencies such as utility regulators competition agencies and those dealing with regulatory impact assessment

Economic Efficiency Ben Van Rompuy, 2012-08-01 Over the past decade we have witnessed an apparent convergence of views among competition agency officials in the European Union and the United States on the appropriate goals of competition law enforcement Antitrust policy it is now suggested should focus on enhancing economic efficiency which we are to believe will promote consumer welfare Recent EU Commission Guidelines on the application of

Article 101 TFEU appear to banish considerations that cannot be construed as having an economic efficiency value such as the environment cultural policy employment public health and consumer protection from the application of Article 101 TFEU Arguing that the professed adoption of an exclusive efficiency approach to Article 101 TFEU does not preclude but rather obfuscates the role of non efficiency considerations the author of this timely contribution accomplishes the following objectives traces the genesis of the shift to an efficiency orientation in EU and US antitrust policy and dispels several ingrained misconceptions that underpin it demonstrates the close interrelationship between evolving images of the purpose of antitrust the development of related enforcement norms and enforcement output provides in depth analyses of a number of analytically rich cases in the audiovisual sector and particularly those related to sports rights and explores what the role of non efficiency considerations in the application of Article 101 TFEU could and should be under the modernized enforcement regime

Intellectual Property Rights and Competition in Standard Setting Valerio Torti,2015-10-05 Competition and intellectual property rights IPRs are both necessary for a market to work efficiently and to promote consumer welfare Properly applied intellectual property rules define a legal framework which allows undertakings to profit from their inventions This in turn encourages competition among firms and enhances dynamic efficiency to the benefit of consumer welfare Standard setting represents one of the fields where the interaction between competition law and IPRs clearly comes to light The collaborative goal of standard setting organizations SSOs is to adopt and promote standards that either do not conflict with anyone s right or if they do are developed under condition that patents are licensed under defined terms This book examines the tension between IPRs and competition in the standard setting field which can arise when innovators over exploit the rights they have been granted and hold up an entire industry The book compares EU and U S jurisdictions with a particular focus on the IT and telecommunication sectors It scrutinizes those practices which could harm standard setting and its goals looking at misleading conducts by SSOs members which may lead to breach the EU and U S antitrust provisions on abuse of market power Recent developments in EU and U S standard setting are analysed highlighting the differences in enforcement approaches The book considers how the optimal balance between IPRs and industry standards can be struck suggesting a policy model which takes into account both innovators interests and SSOs goals

The Interface between Competition and the Internal Market Vasiliki Brisimi,2014-12-01 This book explores the interface between competition law and market integration in the application of Article 102 TFEU focussing on the notion of market separation namely conduct that may hinder cross border trade

Competition Policy and Global Competitiveness in Major Asian Economies Van Hoa Tran,2003 This text reveals how competition policy and competitiveness are crucial to contemporary economic financial and trade management as well as national and international governance and focuses on contemporary major Asian economies facing increasing globalization and the prevailing influence of the WTO

Competition Policy Manfred Neumann,2001 This work combines an analysis of

competition policy in the US and Europe with the analytical tools from industrial organization work that are required to understand each topic The writer synthesizes a mixture of historical theoretical and policy perspectives

Recent Developments in Monopoly and Competition Policy George Norman, 2008 Competition policy aims to prevent anticompetitive agreements and mergers limiting the abusive exercise of market power The formulation and application of this policy presents significant challenges which include showing that proposed mergers are anticompetitive proving that firms are members of cartels and defending apparently restrictive vertical agreements For this insightful volume the editor has selected key papers which illustrate how far we have come towards meeting these challenges They provide comprehensive developmental coverage of the theory that underpins and justifies competition policy and of the econometric tests that demonstrate its effects and violations This timely book will be an invaluable resource to researchers and practitioners alike with an interest in this important subject

The Concept of Abuse in EU Competition Law Pinar Akman, 2012-02-03 The objective s of Article 102 TFEU what exactly makes a practice abusive and the standard of harm under Article 102 TFEU have not yet been settled Using law and economic approaches this book inquires into the possible objectives of Article 102 TFEU and proposes a modern approach to interpreting abuse

Competition Law Günter Hirsch, 2008 This text covers the area of entertainment and broadcasting with explanation of the law and discussion of its practical application in the media world It covers areas such as entertainment contracts broadcasting regulation and disputes

Does EU Merger Control Discriminate Against Small Market Companies? Mika Oinonen, 2010-01-01 Although the question posed by the title of this book has generated considerable debate the essential issue remains open and largely blurred While some believe that there is no so called small market problem others discern discrimination against small market companies i e companies with a strong position in their home markets but a modest position in the European and global markets and a consequent need for changes in competition law The author of this enormously helpful work here sets the stage for meaningful discussion by analysing the EC Merger Regulation s objectives economic foundations and application practice to present a reasoned view of the issues that can be considered relevant for such a discussion Considering their effect on the small market problem the author scrutinizes such factors as the following the Commission s methodology for delineating relevant markets in merger assessments unnecessary prohibition caused by overestimation of the market power of small market mergers erroneous approval of cases that should actually be prohibited impact of the so called Harvard and Chicago schools of competition theory and their key policy implications process related alternative views of competition and new synthesizing approaches relevant criteria for a proper analysis of market power concentration measures and market shares barriers to entry price and profitability analyses and product definition v geographic definition of markets In a final chapter the author presents some tentative conclusions normative in nature concerning the problem and the relevant issues relating to it As the first in depth analysis of the issues that are actually involved with its particular

diagnosis of the assessment of market power in considering the relevant issues for the problem this study brings into salience the terms of the debate on the problem and thus takes a giant step forward towards defining what needs to be done Competition lawyers policymakers and academics in Europe and elsewhere will find the discussion of great value

Handbook of Antitrust Economics Paolo Buccirossi,2008-03-21 Experts examine the application of economic theory to antitrust issues in both the United States and Europe discussing mergers agreements abuses of dominance and the impact of market features Over the past twenty years economic theory has begun to play a central role in antitrust matters In earlier days the application of antitrust rules was viewed almost entirely in formal terms now it is widely accepted that the proper interpretation of these rules requires an understanding of how markets work and how firms can alter their efficient functioning The Handbook of Antitrust Economics offers scholars students administrators courts companies and lawyers the economist s view of the subject describing the application of newly developed theoretical models and improved empirical methods to antitrust and competition law in both the United States and the European Union The book uses the U S term antitrust law and the European competition law interchangeably emphasizing the commonalities between the two jurisdictions After a general discussion of the use of empirical methods in antitrust cases the Handbook covers mergers agreements abuses of dominance or unilateral conducts and market features that affect the way firms compete Chapters examine such topics as analyzing the competitive effects of both horizontal and vertical mergers detecting and preventing cartels theoretical and empirical analysis of vertical restraints state aids the relationship of competition law to the defense of intellectual property and the application of antitrust law to bidding markets network industries and two sided markets Contributors Mark Armstrong Jonathan B Baker Timothy F Bresnahan Paolo Buccirossi Nicholas Economides Hans W Friederiszick Luke M Froeb Richard J Gilbert Joseph E Harrington Jr Paul Klemperer Kai Uwe Kuhn Francine Lafontaine Damien J Neven Patrick Rey Michael H Riordan Jean Charles Rochet Lars Hendrick R ller Margaret Slade Giancarlo Spagnolo Jean Tirole Thibaud Verg Vincent Verouden John Vickers Gregory J Werden

Competition Regulation and Policy at the World Trade Organisation Fiona Marshall,2010 Governmental barriers to trade have gradually been reduced and eliminated initially under the General Agreements on Tariffs and Trade GATT and now under the World Trade Organisation WTO leading to freer fairer and more competitive international trade However private barriers to trade still exist and are not currently addressed by any international agreement As a result the realisation of the goals of free and fair trade aims of the WTO have not completely come to fruition This work analyses the question of whether an international competition agreement to address private barriers should be negotiated from a competition perspective and a trade perspective
