Handbook of Research on International Entrepreneurship Leo Paul Dana, 2004 Dana s Handbook is an essential read for international entrepreneurship scholars as well as policymakers and practitioners concerned with the dynamics associated with the international entrepreneurship process Succinct reviews of the literature and useful summary tables relating to key themes and studies are presented by a number of contributors Paul Westhead *International Small Business Journal* This is a formidable and weighty tome More important than sheer quantity is consideration of the quality and here the broad spread yet eclectic choice of the research papers is most enlightening The contributing authors have collectively condensed much of

the knowledge garnered from the past five years of this global field into one handy sourcebook The end result is indeed a fresh recognition if recognition still needs to be made of the major importance of this new global growth phenomenon of international entrepreneurship Mark Haydon International Journal of Entrepreneurship and Innovation The Handbook is a nearly comprehensive reference work to the field that will be useful to scholars new to the area as well as those already engaged in it I was impressed by the diversity of the authors The Handbook is an excellent broad reference to the field Ben Oviatt Journal of International Business Studies Over the last few years there has been an increased interest in research on the internationalization of new ventures and the global challenges facing growing young businesses The Handbook of Research on International Entrepreneurship has collected and synthesized the contributions of leading researchers in an effort to define and categorize the unique contributions and state of the art of this emerging field It provides a comprehensive multi disciplinary treatment that advances the frontiers of knowledge regarding the fundamental concepts methods and theories of international entrepreneurship The Handbook should serve as both an authoritative and comprehensive reference work for researchers and a state of the art compilation of new insights for educational leaders Ari Ginsberg New York University Stern School of Business US Entrepreneurship and international business have remained separate subjects for far too long The study of international entrepreneurship thrives on the cross fertilisation of ideas between these fields It is one of the most dynamic research areas in economics and management The contributors to this Handbook are the pioneers in the field and this volume provides a definitive survey of their work Mark Casson University of Reading UK These notable researchers share a common dedication to rigorous methodologies and vigorous research Together in this volume the researchers have assembled and presented a cross section of tested methods and innovative approaches These contributions are an inspiration to younger researchers and this bids fair to set the tone and level of intellectual rigour and vigour for future research in the emerging field of international entrepreneurship From the preface by Bob Kirk University of Canterbury New Zealand This unique reference book provides an array of diverse perspectives on international entrepreneurship a new and emerging field of research that blends concepts and methodologies from more traditional social sciences The Handbook includes chapters written by top researchers of economics and sociology as well as academic leaders in the fields of entrepreneurship and international business State of the art contributions provide up to date literature reviews making this book essential for the researcher of entrepreneurship and the internationalisation of entrepreneurs

Mexico Maria L. Castro, Irene P. Navarro, 2009 Mexico's economic, political and societal issues have become major points of interest to countries all over the globe. Mexico is the second leading market for U.S. exports after Canada and is the third most important source of U.S. imports after Canada and China. The United States is Mexico's most important customer by far, receiving about 80 per cent of Mexico's exports, including petroleum, automobiles, auto parts, and winter vegetables, and providing about 50 per cent of Mexico's imports. The United States is the source of over 60 per cent of foreign investment in Mexico and the primary source of important tourism earnings. Mexico is also the leading country in Latin America in terms of U.S. investment, with the total stock of U.S. investment being about 85 billion in 2006. This book presents in depth analyses of such issues as foreign policy, political reform, and overall economic developments.

Trends in International Trade Issues Robert V. Weeks, 2006 While some may dispute that economics is the driving force behind much of history, nobody can argue that trade is not a significant factor in international relations. In an increasingly globalised world, products are perpetually crossing borders, leading to both political and fiscal conflicts. Businesses have to face diverse markets and regions while worrying about protectionist government initiatives that hamper free trade. Even the ostensible champion of free markets, America, has its own streak of inhibiting the flow of goods, witness the recent steel tariffs which have angered European partners. No society therefore is immune to the pressures of world trade and the need to balance the free movement of products with the desire to preserve domestic industries. This book assembles a collection of articles examining some of the most current and divisive issues in the international trade arena. They range from the tensions between the United States and Mexico in NAFTA to the war-fuelled trade in diamonds in Africa. With such a broad range of issues discussed, this book serves as a needed tool for understanding the most important contemporary economic subjects.

Breaking Through the Glass Ceiling Linda Wirth, 2001 Women around the world have achieved higher levels of education than ever before and today represent more than 40 per cent of the global workforce. Yet their share of management positions remains low, with just a tiny proportion succeeding in breaking through the glass ceiling. This study reviews the changing position of women in the labour market and in professional and managerial work. It examines the obstacles to women's career development and the action taken to improve their opportunities and promote gender equality.
