An Introductory Guide to EC Competition Law and Practice Valentine Korah, 2007-10-01 This is the ninth edition of Professor Korah's widely respected Yellow Book on EC competition law and practice. For many years used by both practising lawyers and law students as well as officials, this book has kept pace with the rapid development of the subject. Its description of economic theory and the policy considerations which underpin the law and its enforcement are even more important in the era of modernisation when the enforcement of competition law has become decentralised to the Member States and when new Member States have recently become subject to EC competition law. The book addresses questions to which there is no clear answer and is used by experts as well as by those less familiar with the subject. Its analysis and trenchant comment on the legislation, case law and policies have had some influence on the development of the law, a fact acknowledged by many experts in the subject. Despite the complexity of the topic, this remains a lucid and readable overview which is ideal for newcomers to the subject

United States Competition Law with respect to Unfair Trade Practices Philipp Rosenauer, 2011-05-23 Bachelor Thesis from the year 2010 in the subject Business economics Law grade 1 University of Linz course Bachelorseminar language English abstract

According to Black's Law dictionary, competition is the struggle for commercial advantage. The efforts taken of companies to achieve the respective commercial advantages can be especially in a free market economy ample. Let's illustrate this fact by the following examples. Suppose that an automobile manufacturer incensed by a car magazine's constant ridicule of its cars launches a rival magazine with a similar name and layout, copies the other paper's stories, lures away the employees, advertisers and subscribers of the other magazine by offering them higher wages and lower advertising and subscribing rates and finally succeeds in running its critical opponent out of business. Has the automobile manufacturer engaged in any unfair trade practices for which the owners of the car magazine may seek legal remedy? Or has the manufacturer acted in a permissible way to the magazine's attack? Furthermore, could the magazine be said to have engaged in an unfair trade practice by permanently ridiculing the cars and its manufacturer? How can a merger between two or more businesses which are on the same market level and which manufacture similar products in the same geographic region influence consumers? What if two competitors agree in the artificial setting of prices at a certain level, contrary to the workings of the free market? Do consumers have legal remedies against companies who engage in false advertising or who distribute faulty and dangerous

goods The body of law which deals with these subjects is known as competition law which can broadly be divided into Consumer Protection Law and unfair trade practices on the one hand and antitrust law on the other hand The bachelor thesis at hand takes the reader to a journey through competition law with a special insight into Unfair Trade Practices After the study of the bachelor thesis the respective reader should be able to generally orientate him or herself in this highly practice oriented field of law
