Circles Of Power Shifting Dynamics In A Lesbiancentered Community:

Circles of Power Barbara Summerhawk, La Verne Gagehabib, 2000 A compelling study of the Southern Oregon Women's Community one of the most vital and dynamic alternative communities to take root during America's back to the land movement of the 1970s The editors provide an in depth analysis of the roots heart and spirit of this lively and largely lesbian circle of women which extends from the border of Northern California up the I 5 corridor through Eugene Oregon [Seeing Nature Through Gender](#) Virginia Scharff, 2003 Environmental history has traditionally told the story of Man and Nature Scholars have too frequently overlooked the ways in which their predominantly male subjects have themselves been shaped by gender Seeing Nature through Gender here reintroduces gender as a meaningful category of analysis for environmental history showing how women's actions desires and choices have shaped the world and seeing men as gendered actors as well In thirteen essays that show how gendered ideas have shaped the ways in which people have represented experienced and consumed their world Virginia Scharff and her coauthors explore interactions between gender and environment in history Ranging from colonial borderlands to transnational boundaries from mountaintop to marketplace they focus on historical representations of humans and nature on questions about consumption on environmental politics and on the complex reciprocal relations among human bodies and changing landscapes They also challenge the ecofeminist position by challenging the notion that men and women are essentially different creatures with biologically different destinies Each article shows how a person or group of people in history have understood nature in gendered terms and acted accordingly often with dire consequences for other people and organisms Here are considerations of the ways we study sexuality among birds of William Byrd's masking sexual encounters in his account of an eighteenth century expedition of how the ecology of fire in a changing built environment has reshaped firefighters own gendered identities Some are playful as in a piece on the evolution of snow bunnies to shred bunnies Others are dead serious as in a chilling portrait of how endocrine disruptors are reinventing humans animals and water systems from the cellular level out Aiding and adding significantly to the enterprise of environmental history Seeing Nature through Gender bridges gender history and environmental history in unexpected ways to show us how the natural world can remake the gendered patterns we've engraved on ourselves and on the planet **The Palgrave International Handbook of Women and Outdoor Learning** Tonia Gray, Denise Mitten, 2018-05-12 This Handbook serves as a starting point for critical analysis and discourse about the status of women in outdoor learning environments OLEs Women choose to participate actively in outdoors careers many believing the profession is a level playing field and that it offers alternatives to traditional sporting activities They enter outdoor learning primarily on the strength of their enthusiasm for leading and teaching in natural environments and assume the field is inclusive rewarding excellence regardless of age gender socioeconomic status disability or ethnicity However both research and collective experiences in OLEs suggest that many women feel invisible relegated marginalized and undervalued In response to this marginalization

this Handbook celebrates the richness of knowledge and practices of women practitioners in OLEs Women scholars and practitioners from numerous fields such as experiential outdoor education adventure education adventure therapy and gender studies explore the implications of their research and practice using poignant examples within their own disciplines These insights emerge from similar life experiences as women and outdoor leaders in the 1970s to the present Social inequalities still abound in OLEs and the Handbook ensures that the contributions of women are highlighted as well as the work that needs to be done to make these spaces inclusive Global in perspective and capacious in content this one stop volume is an indispensable reference resource for a diverse range of academics including students and researchers in the fields of education psychology sociology gender studies geography and environment studies as well as the many outdoors fields

Califia Women Clark A. Pomerleau, 2013-11-15 Launched in 1975 the Califia Community organized activist educational camps and other programs in southern California until its dissolution in 1987 An alternative to mainstream academia s attempts to tie feminism to university courses Califia blended aspects of feminism that spanned the labels second wave and radical attracting women from a range of gender expressions sexual orientations class backgrounds and races or ethnicities Califia Women captures the history of the organization through oral history interviews archives and other forms of primary research The result is a lens for re reading trends in feminist and social justice activism of the time period contextualized against a growing conservative backlash Throughout each chapter readers learn about the triumphs and frictions feminists encountered as they attempted to build on the achievements of the postwar Civil Rights movement With its backdrop of southern California the book emphasizes a region that has often been overlooked in studies of East Coast or San Francisco Bay area activism Califia Women also counters the notions that radical and lesbian feminists were unwilling to address intersectional identities generally and that they withdrew from political activism after 1975 Instead the Califia Community shows evidence that these and other feminists intentionally created an educational forum that embraced oppositional consciousness and sought to serve a variety of women including radical Christian reformers Wiccans scholars of color and GLBT activists

Eden Within Eden James J. Kopp, 2009 Oregon has been the home of nearly three hundred communal experiments since the Aurora Colony was established in 1856 Eden Within Eden is the first book to survey the state s utopian history from religious and Socialist groups of the nineteenth century to ecologically conscious communities of the twenty first century James J Kopp examines Oregon s communal history in the context of the state as a destination for those seeking new beginnings and in the framework of utopian and communal experiences across America Eden Within Eden provides rich detail about utopian communities some realized some only planned many of which reflect broader social political economic

and cultural aspects of Oregon's history From the dawn of communal groups in Oregon the German Christian colony at Aurora to Oregon's most infamous communal experiment Rajneeshpuram this study examines the range of attempts to establish ideal communities in the state These include the Jewish agrarian colony of New Odessa in the 1880s as well as the new pioneers of the 1960s and later who captured the spirit of the counterculture as well as growing concerns about the environment The book explores other areas of Oregon's utopian heritage as well including literary works and idealistic city planning There has been no comparable book published on Oregon's communal history and few such comprehensive examinations of other states The appendix is a rich compilation that will guide individuals to additional information on the profiled and many other communities *Eden Within Eden* will appeal to students and scholars of communal studies and Pacific Northwest history as well as to general readers interested in these subjects

Herlands Keridwen N. Luis, 2018-10-23 How women only communities provide spaces for new forms of culture sociality gender and sexuality Women's lands are intentional collective communities composed entirely of women Rooted in 1970s feminist politics they continue to thrive in a range of ways from urban households to isolated rural communes providing spaces where ideas about gender sexuality and sociality are challenged in both deliberate and accidental ways *Herlands* a compelling ethnography of women's land networks in the United States highlights the ongoing relevance of these communities as vibrant cultural enclaves that also have an impact on broader ideas about gender women's bodies lesbian identity and right ways of living As a participant observer Keridwen N Luis brings unique insights to the lives and stories of the women living in these communities While documenting the experiences of specific spaces in Massachusetts Tennessee New Mexico and Ohio *Herlands* also explores the history of women's lands and breaks new ground exploring culture theory gender theory and how lesbian identity is conceived and constructed in North America Luis also discusses how issues of race and class are addressed the ways in which nudity and public hygiene challenge dominant constructions of the healthy or aging body and the pervasive influence of hegemonic thinking on debates about transgender women Luis finds that although changing dominant thinking can be difficult and incremental women's lands provide exciting possibilities for revolutionary transformation in society

Lesbian Rites Ramona Faith Oswald, 2014-06-03 Explore affirmation and coping rituals for lesbian singles couples and communities This pioneering book is a multidisciplinary compilation of scholarship addressing lesbians the rituals in their lives and the meaning and impact of those rituals for the women involved and the

people and communities around them. It offers a diverse range of perspectives on what it means to be a lesbian, what ritual is, what it means to enact a ritual, and how we can understand lesbian ritual experiences. *Lesbian Rites: Symbolic Acts and the Power of Community* presents five explorations of ritual that bring forth themes of lesbian-centered social change. In *Death's Midwife*, Sharon Jaffe creates a narrative that illustrates the power of ritual to reconcile straight and gay Christian and Pagan in end-of-life situations. Next, Ruth Barrett's exploration of Dianic traditions provides a brief history of the importance of Goddess worship to radical lesbian feminists and uses those traditions to create life-course rituals. Marla Brettschneider's *Ritual Encounters of the Queer Kind* challenges notions of a static lesbian self and instead reworks Judaism and anarchist politics to propose rituals of continuous becoming. Krista McQueeney then analyzes the paradoxes of a lesbian commitment ceremony held within a gay-affirmative African American congregation in the southern United States. Elizabeth Suter and editor Ramona Faith Oswald use exploratory survey data to examine how lesbian couples may use name-changing as a strategy to claim family status. In addition, *Lesbian Rites* also includes two chapters that examine how lesbians have been compromised if not harmed by the ritualization of heterosexism and homophobia. The first is an insightful analysis of the community response to the feminist retreat known as Camp Sister Spirit. In this chapter, Kate Greene uses Mary Daly's seven patterns of sado-ritual syndrome to show how the people opposed to the camp were organized to uphold heterosexual patriarchy through an obsession with purity that defined the camp as a refuge for immorality. The second chapter on this subject reviews the editor's own experiences of being hidden and devalued at heterosexual family weddings.

Shifting Identities [microform] : the Concept of Lesbian Community Tracy Nielsen, 1994 *Identity Politics* Shane Phelan, 1989-09-05. Lesbian feminism began and has fueled itself with the rejection of liberalism. In this rejection, lesbian feminists were not alone. They were joined by the New Left, by many blacks in the civil rights movement, by male academic theorists. What all these groups shared was an intense awareness of the ways in which liberalism fails to account for the social reality of the world through a reliance upon law and legal structure to define membership through individualism through its basis in a particular conception of rationality. In tracing how lesbian feminism came to be defined in uneasy relationships with the Women's Movement and gay rights groups, Shane Phelan explores the tension between liberal ideals of individual rights and tolerance and communitarian ideals of solidarity. The debate over lesbian sado-masochism, an expression of individual choice or pornographic anti-feminist behavior, is considered as a test case. Phelan addresses the problems faced by the woman-identified woman in a liberal society that presumes heterosexuality as the biological, psychological, and moral standard. Often silenced by laws defining their sexual behavior as criminal and censured by a medical establishment that persists in defining homosexuality as perversion, lesbians like blacks and other groups have fought to have the same rights as others in their communities and even in their own homes. Lesbian feminists have also sought to define themselves as a community that would be distinctly different, a community that would disavow the traditional American obsession with

individual advancement in the world as it is In this controversial study of political philosophy and the women s movement Phelan argues that the failure to date to produce a satisfying theory and program for lesbian action is reflective of the failure of modern political thinking to produce a compelling nonsuspect alternative to liberalism In the series Women in the Political Economy edited by Ronnie J Steinberg **The Lesbian Community** Deborah Goleman Wolf,1977
