## **Cities And Natural Process:**

Cities and Natural Process Michael Hough, 2004-07-31 *Cities and Natural Process* is a book for all concerned with the future of our cities their design and sustainability and our quality of life within them Michael Hough describes how economic and technological values have squeezed any real sense of nature out of the modern city the ways in which this has led to a divisive separation of countryside and city wasted much of the city's resources and shaped an urban aesthetic which is sharply at odds with both natural and social processes Against this is set an alternative history of ecological values informing proven approaches to urban design which work with nature in the city *Cities and Natural Process* Michael Hough, 2004 This key book is a revised and updated discussion of the fundamental conflict in the perception of nature and an expression of the essential need for an environmental view when approaching urban design Whilst retaining the existing structure each of the chapters has been revised to take into account recent theoretical and practical developments A completely new concluding chapter has been added which draws together the themes of the volume and links these to broader landscape issues such as greenway systems landscape ecology and green infrastructure
