## **Cities Of Light:**

**Cities of Light** Sandy Isenstadt, Margaret Maile Petty, Dietrich Neumann, 2014-12-17 *Cities of Light* is the first global overview of modern urban illumination a development that allows human wakefulness to colonize the night doubling the hours available for purposeful and industrious activities Urban lighting is undergoing a revolution due to recent developments in lighting technology and increased focus on sustainability and human scaled environments *Cities of Light* is expansive in coverage spanning two centuries and touching on developments on six continents without diluting its central focus on architectural and urban lighting Covering history geography theory and speculation in urban lighting readers will have numerous points of entry into the book finding it easy to navigate for a quick reference and or a coherent narrative if read straight through With chapters written by respected scholars and highly regarded contemporary practitioners this book will delight students and practitioners of architectural and urban history area and cultural studies and lighting design professionals and the institutional and municipal authorities they serve At a moment when the entire world is being reshaped by new lighting technologies and new design attitudes the longer history of urban lighting remains fragmentary *Cities of Light* aims to provide a global framework for historical studies of urban lighting and to offer a new perspective on the fast moving developments of lighting today

**Cities of Light and Heat** Mark H. Rose, 1995-01-01 *Cities of Light and Heat* takes us to Kansas City and Denver during the late nineteenth century when gas and electricity were introduced to these instant cities of the west With rich detail Mark Rose shows how the new technology spread during the next century from a few streets and businesses within the city limits to countless private homes in the suburbs In Kansas City and Denver as in most communities throughout the U S business executives city leaders and engineers acted as early promoters of the new technology But by the early 1900s educators home builders architects and salespersons were becoming increasingly important as gas and electric utilities and appliances reached more and more American homes But these voices for the new technology brought with them their own social attitudes and cultural values By mid century whether in the classroom or in advertisements Americans were regularly encouraged to fit the new technology within prevailing notions of cleanliness comfort convenience and gender Although in hindsight the spread of modern technology might seem inevitable to us Rose shows how even the leaders of the nation s great gas and electric corporations with their vast production and distribution facilities were subject to geography competing ideologies urban politics and even the choices of ordinary consumers Rose thus locates the driving force behind the diffusion of technology in the neighborhoods kitchens and offices of the city *Cities of Light and Heat* shows the importance of culture politics and urban growth in shaping technological change in the cities of North America
