**Rivers at Risk** John Echeverria, Pope Barrow, Richard Roos-Collins, American Rivers, 1989-11-01 Rivers at Risk is an invaluable handbook that offers a practical understanding of how to influence government decisions about hydropower development on America's rivers [Vermont Comprehensive Rivers Program](#) Vermont. Department of Environmental Conservation, 1989 [The Workbook](#), 1985 [Who Owns Appalachia?](#) Appalachian Land Ownership Task Force, 2014-07-15 Long viewed as a problem in other countries the ownership of land and resources is becoming an issue of mounting concern in the United States Nowhere has it surfaced more dramatically than in the southern Appalachians where the exploitation of timber and mineral resources has been recently aggravated by the ravages of strip mining and flash floods This landmark study of the mountain region documents for the first time the full scale and extent of the ownership and control of the region's land and resources and shows in a compelling yet non polemical fashion the relationship between this control and conditions affecting the lives of the region's people Begun in 1978 and extending through 1980 this survey of land ownership is notable for the magnitude of its coverage It embraces six states of the southern Appalachian region Virginia West Virginia Kentucky Tennessee North Carolina and Alabama From these states the research team selected 80 counties and within those counties field workers documented the ownership of over 55 000 parcels of property totaling over 20 million acres of land and mineral rights The survey is equally significant for its systematic investigation of the relations between ownership and conditions within Appalachian communities Researchers compiled data on 100 socioeconomic indicators and correlated these with the ownership of land and mineral rights The findings of the survey form a generally dark picture of the region local governments struggling to provide needed services on tax revenues that are at once inadequate and inequitable economic development and diversification stifled increasing loss of farmland a traditional source of subsistence in the region Most evident perhaps is the adverse effect upon housing resulting from corporate ownership and land speculation Nor is the trend toward greater conglomerate ownership of energy resources the expansion of absentee ownership into new areas and the search for new mineral and energy sources encouraging Who Owns Appalachia will be an enduring resource for all those

interested in this region and its problems It is moreover both a model and a document for social and economic concerns likely to be of critical importance for the entire nation

**A Citizen's Guide to the City of Napa, Napa River, & Napa Creek Flood Protection Project** ,1998 *Wild and Scenic Rivers of America* Tim Palmer,1993 A new vision is sweeping through ecological science The dense web of dependencies that makes up an ecosystem has gained an added dimension the dimension of time Every field forest and park is full of living organisms adapted for relationships with creatures that are now extinct In a vivid narrative Connie Barlow shows how the idea of

missing partners in nature evolved from isolated curious examples into an idea that is transforming how ecologists understand the entire flora and fauna of the Americas This fascinating book will enrich and deepen the experience of anyone who enjoys a stroll through the woods or even down an urban sidewalk But this knowledge has a dark side too Barlow s ghost stories teach us that the ripples of biodiversity loss around us now are just the leading edge of what may well become perilous cascades of extinction
