Citizens Or Consumers:

EBOOK: Citizens or Consumers: What the Media Tell us about Political Participation Justin Lewis, Sanna Inthorn, Karin Wahl-Jorgensen, 2005-09-16 In this superb account of how the British and American news media represent everyday citizens and public opinion the authors show how coverage of politics and policy debates subtly even inadvertently urge people to see themselves as and thus to be politically passive disengaged and cynical The book's analysis of how journalists misrepresent even invent public opinion is alone worth the price of admission Written with great verve passion and unswerving clarity Citizens or Consumers promises to become an instant classic in the study of the failings and the still untapped promise of the news media to further democracy Susan J Douglas Catherine Neafie Kellogg Professor and Chair Department of Communication Studies The University of Michigan Based on an exhaustive cross Atlantic empirical study Citizens or Consumers is an engaging and incisive contribution to a subject usually restricted to clichés and vague generalizations Looking not only at how media impact upon their audiences but the manner in which that influence is mediated by the way in which citizenship itself is represented in news stories Lewis et al offer us unusual and keen insight into a familiar world Written in an engaging and lively style first year students and experienced faculty members as well as general readers will benefit from its many perceptive insights Especially useful are the last few pages which suggest how journalists might alter their representation practices to invoke citizenship rather than passive consumerism Sut Jhally Professor of Communication University of Massachusetts at Amherst Founder Executive Director Media Education Foundation The two great duelists for our attention citizens and consumers are locked in a struggle for the future of democracy Citizens or Consumers offers its readers a sharp lesson in how the media highlight and distort that struggle It's the kind of lesson we all need Toby Miller author of Cultural Citizenship In recent years there has been much concern about the general decline in civic participation in both Britain and the United States especially among young people At the same time we have seen declining budgets for serious domestic and international news and current affairs amidst widespread accusations of a dumbing down in the coverage of public affairs This book enters the debate by asking whether the news media have played a role in producing a passive citizenry And if so what might be done about it Based on the largest study of the media coverage of public opinion and citizenship in Britain and the United States this book argues that while most of us learn about politics and public affairs from the news media we rarely see or read about examples of an active engaged citizenry Key reading for students in media and cultural studies politics and journalism studies [Citizens Or Consumers?](#)

Wayne Andrew Antony, Dave Broad, 1999 Social policy is about citizens choosing the kind of society they want to live in The mid 20th century Keynesian welfare state can be seen as a citizenship package which included acceptance of intervention by the state to maintain economic growth and social stability This meant the inclusion of many previously excluded groups in the social policy process and the institutionalization of a collective responsibility for individual welfare But with the ascendancy

of neo liberalism the politics of citizenship is being replaced by a notion of citizens as consumers whose medium of social interaction and source of economic and social security is the capitalist market This book is concerned with social welfare problems and the need for citizen participation in addressing those problems While all of the authors are critical of the current neo liberal orthodoxy none advocates a return to the status quo ante of the post Second World War welfare state
