Citizenship And Conscience:

The Ethics of Citizenship in the 21st Century David Thunder,2017-03-08 This collection of essays offers thoughtful discussions of major challenges confronting the theory and practice of citizenship in a globalized socially fragmented and multicultural world The traditional concept of citizenship as a shared ethnic religious and or cultural identity has limited relevance in a multicultural world and even the connection between citizenship and national belonging has been put in jeopardy by increasing levels of international migration and mobility not to mention the pervasive influence of a global economy and mass media whose symbols and values cut across national boundaries Issues addressed include the ethical and practical value of patriotism in a globalized world the standing of conscience claims in a morally diverse society the problem of citizen complicity in national and global injustice and the prospects for a principled acceptance by practising Muslims of a liberal constitutional order In spite of the impressive diversity of philosophical traditions represented in this collection including liberalism pragmatism Confucianism Platonism Thomism and Islam all of the volume s contributors would agree that the crisis of modern citizenship is a crisis of the ethical values that give shape form and meaning to modern social life This is one of the few edited volumes of its kind to combine penetrating ethical discussion with an impressive breadth of philosophical traditions and approaches Chapters What is the use of an Ethical Theory of Citizenship and An Ethical Defense of Citizenship are available open access under a Creative Commons Attribution 4 0 International License via link springer.com

Citizenship Derek Heater,2004-09-04 Citizenship describes analyzes and interprets the topic of citizenship in a global context as it has developed historically in its variations as a political concept and status and the ways in which citizens have been and are being educated for that status The book provides a historical survey which ranges from the Ancient Greeks to the twentieth century and reveals the legacies which each era passed on to later centuries It explains the meaning of citizenship what political citizenship entails and the nature of citizenship as a status and also tackles the issue of whether there can be a generally accepted holistic understanding of the idea For this new edition an epilogue has been written which demonstrates the intense nature of the academic and pedagogical debates on the subject as well as the practical matters relating to the status since 1990

Good Citizenship for the Next Generation Ernesto Treviño,Diego Carrasco,Ellen Claes,Kerry J. Kennedy,2021-08-31 This Open Access book presents an international group of scholars seeking to understand how youth from different cultures relate to modern multidimensional concepts of citizenship and the roles that education and society

have in shaping the views of the world's future citizens. The book also explores how different aspects of citizenship such as attitudes towards diverse population groups and concerns for social issues relate to classical definitions of norm-based citizenship from the political sciences. Authors from Asia, Europe, and Latin America provide a series of in-depth investigations into how concepts of good citizenship are shaped in different regions of the globe using the rich comparative data from the IEA's International Civic and Citizenship Study (ICCS) 2016. In twelve chapters, the authors review the concept of good citizenship, how citizenship norms adherence is configured into profiles across countries, and what country, school, and background factors are related to how students adhere to citizenship norms. Recognizing contingent social and political situations in specific regions of the world, the present books offer six chapters where authors apply their expertise to offer locally relevant and pertinent observations on how young people from diverse cultures understand and relate to different dimensions of citizenship in countries of Asia, Europe, and Latin America. The present book is of relevance for different audiences interested in civic education and political socialization, including social sciences and education, integrating topics from political science, sociology, political psychology, and law.

Pennsylvania School Journal, 1898 *Global Citizenship Education in Teacher Education* Daniel Schugurensky, Charl Wolhuter, 2020-05-10. Global Citizenship Education and Teacher Education brings together scholars and practitioners from all continents to explore the role of teacher education in formulating a practice of citizenship that has a global scope and is guided by critical and emancipatory approaches. By considering educational responses to global challenges such as global warming, rising levels of inequalities, intensification of armed conflicts, growing streams of international migration, and the impact of neoliberal policies, this book provides valuable analyses for researchers, teacher educators, and educators. The volume examines historical and conceptual issues relating to the incorporation of global citizenship education in teacher education and presents examples from across the world that showcase main trends in research and practice from across the world. This book is of great interest to graduate and postgraduate students, researchers, and libraries in the fields of citizenship education, global education, teacher education, international and comparative education, and education policy and politics.

Safe Citizenship, Or, Canadian and American Citizenship James Frith Jeffers, James Lawrence Nichols, 1896 *First Lessons in Civics* Samuel Eagle Forman, 1898 **To Whom Do Children Belong?** Melissa Moschella, 2016-06-02. Most people believe that parents have rights to direct their children's education and upbringing. But why? What grounds those rights? How broad is their scope? Can we defend parental rights against those who believe we need more extensive state educational control to protect children's autonomy or prepare them for citizenship in a diverse society? Amid heated debates over issues like sexual education, diversity education, and vouchers, Moschella cuts to the heart of the matter, explaining why education is primarily the responsibility of parents, not the state. Rigorously argued yet broadly accessible, the book offers a principled case for expanding school choice and granting exemptions when educational programs or regulations threaten parents' ability to raise their children in line with their values.

Philosophical argument is complemented with psychological and social scientific research showing that robust parental rights protections are crucial for the well being of parents children and society as a whole The Humanist ,1920 The Christian Work and the Evangelist ,1906 The Education of the American Citizen Arthur Twining Hadley,1902
