## **Citroën Ds:**

*Alison and Peter Smithson* Alison Smithson, Peter Smithson, Beatriz Colomina, Design Museum (London, England), 2004 Striving to adapt the progressive ideas of the pre war modern movement to the specific human needs of post war reconstruction Alison and Peter Smithson were among the most influential and controversial architects of the latter half of the twentieth century As younger members of CIAM Congr s Internationaux d Architecture Moderne and as founding members of Team 10 they were at the heart of the debate on the future course of Modern Architecture Their polemics and designs addressing issues such as the rising consumer society and the orientation of urban planning laid the foundations for New Brutalism and the Pop Art Movement of the 1960s An important adaptation made by the Smithsons and their generation was the rejection of modernism s machine aesthetics The new notions of place and territory were juxtaposed to Le Corbusier s machine habiter To the Smithsons a house was a particular place which should be suited to its location and able to meet the ordinary requirements of everyday life and to accommodate its inhabitants individual patterns of use This exhibition examines the evolution of the Smithsons approach to this everyday art of inhabitation It does this by extensively documenting most of their designs for individual dwellings especially their optimistic House of the Future of 1956 and the series of renovations of and additions to the fairy tale like Hexenhaus in Germany from the late 1980s onward **Citroën DS** Malcolm Bobbitt, 1999 When the Citroën DS was unveiled at the 1955 Paris Motor show it took the motoring world by storm Its futuristic shape was likened to a space ship and even 20 years later when it went out of production it was still one the most visibly and technically advanced cars of its day In this illustrated history of the car Malcolm Bobbitt recalls the long career of this extraordinary car and suggests why it became an icon of automobile design He uses 240 historical photographs to show its long development starting with the first design studies made before World War II and the first prototype of 1952 The book chronicles the production history of the DS and its less sophisticated sister car the ID and it seeks to explain the many facets of this complex idiosyncratic vehicle The author also describes how this reliable family saloon proved to be a formidable rally contender and for a generation provided formal transport for the French president and government

*Citroën DS* Lance Cole, 2021-08-31 Launched in 1955 yet looking like a sci fi design proposal for a future then undreamed of Flaminio Bertoni s ellipsoid sculpture with wheels that was the Citroën DS stunned the world There was a near riot at the 1955 Paris Motor Show launch of the car orders flooded in for this the new big Citroën a Voiture a Grande Diffusion or VGD as the car that replaced the legendary Traction Avant range The term DS stems from two Citroën parts of nomenclature the type of engine used as the 11D D and the special hemispherical design of the cylinder head as Culasse Special S DS out of Deesse or Goddess was a more popular myth of DS origination but an erroneous one But it was not just the car s aerodynamically advanced body shape Cd 0.37 that framed the genius of the DS hydro pneumatic self levelling suspension advanced plastics and synthetics for the construction of the roof and dashboard fascia and amazing road holding and cabin

comfort were some of this car's highlights. Only the lack of an advanced new engine was deemed a missed opportunity. In fact, Citroën had created a new engine for the car but lacked the resources to produce it in time for 1955. DS was a major moment in the history of car design, one so advanced that it would take other auto manufacturers years to embrace. Yet DS in its aero design was the precursor to today's low drag cars of curved form. Manufactured worldwide, used by presidents, leaders, diplomats, farmers, and many types of people, the DS redefined Citroën, its engineering and design language, and its brand for decades to come. Prone to rust, not the safest car in the world, and always lacking a smoother powerplant, the DS still became an icon of car design. Reshaped with a new nose and faired-in headlamps in 1967, DS remained in production until 1975. Across its life, DS spawned an estate car variant, the Safari, a range of limousines, two-door convertibles, and even coach-built coupes and rally specials. This car was a product design that became an article of social science; it was that famous and it defined a European design movement upon a global stage, then packed with me-too copyist designs. The DS, or Goddess, as it was tagged, was a tear-drop shaped act of French confidence in a world of the regurgitation of the known. Some argue that DS and its effect has never been surpassed. This new value for money book provides innovative access to the design history and modeling of the revolutionary DS, one of the true greats of motoring history and a contemporary classic car of huge popularity.

**Citroën DS** Malcolm Bobbit, 1999-06-04. Citroën stunned the automotive world when the DS series was introduced in 1955. Daringly futuristic and amazingly sophisticated mechanically, it made most cars on the road at the time obsolete. John Pressnell recounts the full story of the design, development, and production of these unique cars and offers specifications plus a wide selection of archive and contemporary photos. [Citroën DS](#) Geoffrey Webber, Mark Gordon, 2019-07-15. The Citroën DS was selected by motoring experts and the public as the most beautiful classic car of the twentieth century. French designer Flaminio Bertoni's Goddess is considered a work of art, a sculpture on wheels. Some even called it the Sydney Opera House of motoring. Released in October 1955 in Paris, France, the first DS19 to arrive in Australia stunned onlookers at the Sydney Royal Easter Show in 1956. Its most notable innovation was the suspension allowing the car to go up and down. But there were many more outstanding features that made it such a seductive car. Many DS models came to this country from 1956 to 1975. As Citroën celebrates a hundred years since its launch, it is fitting to record the untold stories of the importers, distributors, owners, mechanics, racing drivers, restorers, artists, and many more behind the story of the DS in Australia. With over 750 photographs, 120 original illustrations, and exhaustive research, the authors have given voice to a definitive history of the Citroën DS in this country, capturing the essence of this stunning design and engineering marvel.

[Citroën DS](#) Daniel Denis, 2012-12-01. This is a sumptuous photographic record of the Citroën DS in all its myriad forms. Launched as a futuristic vision in 1955, the DS family of cars continued in production for just over 20 years, evolving through two distinct styling phases, three key bodyshell types: saloon, estate, and cabriolet. Numerous specification changes and various powertrain developments, as well as some fascinating spin-off versions, and every detail is recorded in over 500 colour.
