Civil Rights And Liberties Principles Of Interpretation:

Civil Rights and Liberties, 1996 *Civil Rights and Liberties* Andrea L. Bonnicksen, 1982 *Principles of Human Rights Adjudication* C. A. Gearty, 2004 This book takes a fresh look at the place of the Human Rights Act in Britain's constitutional order [The Journal of Social, Political and Economic Studies](#), 1982 *Human Rights Unbound* Lea Raible, 2020-05-03 This book explores to what extent a state owes human rights obligations to individuals outside of its territory when the conduct of that state impacts upon the lives of those individuals It draws upon legal and political philosophy to develop a theory of extraterritoriality based on the nature of human rights merging accounts of economic social and cultural rights with those of civil and political rights Lea Raible outlines four main arguments aimed at changing the way we think about the extraterritoriality of human rights First she argues that questions regarding extraterritoriality are really about justifying the allocation of human rights obligations to specific states Second the book shows that human rights as found in international human rights treaties are underpinned by the values of integrity and equality Third she shows that these same values justify the allocation of human rights obligations towards specific individuals to public institutions including states that hold political power over those individuals And finally the book demonstrates that title to territory is best captured by the value of stability as opposed to integrity and equality On this basis Raible concludes that all standards in international human rights treaties that count as human rights require that a threshold of jurisdiction understood as political power over individuals is met The book applies this theory of extraterritoriality to explain the obligations of states in a wide range of cases **International Economic Law in the 21st Century** Ernst-Ulrich Petersmann, 2012-07-24 This book argues that multilevel governance failures are due to poor regulation of the collective action problems in the supply of goods **Human Rights Protection for Refugees, Asylum-Seekers, and Internally Displaced Persons: A Guide to International Mechanisms and Procedures** Joan Fitzpatrick, 2021-11-22 This volume provides a detailed and concrete analysis of how human rights complaints mechanisms can be accessed by refugees asylum seekers and internally displaced persons The guide offers a thorough explanation of the United Nations human rights treaty bodies with a focus upon the four committees authorized to receive communications from individuals Detailed information is provided concerning procedural requirements while the treaties are analyzed for their relevance to the forcibly displaced United Nations mechanisms are also examined with an emphasis on the thematic and country special procedures of the Commission on Human Rights Published under the auspices of the Procedural Aspects of International Law Institute PAIL For more information about PAIL please go to pail.institute.org Published under the Transnational Publishers imprint *International Human Rights Law in Africa* Christof Heyns, Morne van der Linde, 2022-11-07 Contrary to popular belief there is a vast body of law dealing with human rights in Africa in existence today The first priority at the moment is consequently not the adoption of new norms or the creation of even more structures the most immediate challenge lies in making the existing structures work and ensuring compliance with the norms

already accepted by African societies Access to the relevant material constitutes a necessary precondition for any other gains in this field The aim of this reference work is therefore to make African human rights law accessible to all those involved in or interested in human rights law on the continent in order to strengthen its impact Primary documents are introduced and reproduced and presented in a coherent framework The main institutions public and private dealing with human rights in Africa are identified and discussed Comprehensive overviews of the international human rights legal regimes applicable to Africa as well as country reports are provided Access to this body of law will enable judges practicing lawyers academics and other researchers as well as law reformers NGOs activists and students to both ascertain and assert these rights It will also serve to ensure the development of a stronger indigenous African human rights jurisprudence rooted in local experience history culture and practices This book consequently tries to contribute towards documenting systemising and anchoring the African human rights system This publication replaces and updates the earlier Human Rights Law in Africa Series which appeared on an annual basis from 1996 to 1999 In order to make the publication accessible in Africa the Centre for Human Rights and the Raoul Wallenberg Institute in Sweden have undertaken a targeted distribution campaign on the continent The print edition is available as a set of two volumes 9789004138810 Modern American Law: Constitutional law: definitions and general principles William Charles Wermuth,1921 **A Course of Three Lectures on Free Church Principles: Considered in the Light of Holy Scripture, History and Recent Legislation** Scotland. - Free Church.
