college George L Campbell worked for the BBC World Service and was a polyglot linguist and translator Global Brain  
Howard Bloom,2008-04-21 As someone who has spent forty years in psychology with a long standing interest in evolution I ll  
just assimilate Howard Bloom s accomplishment and my amazement DAVID SMILLIE Visiting Professor of Zoology Duke  
University In this extraordinary follow up to the critically acclaimed *The Lucifer Principle* Howard Bloom one of today s  
preeminent thinkers offers us a bold rewrite of the evolutionary saga He shows how plants and animals including humans  
have evolved together as components of a worldwide learning machine He describes the network of life on Earth as one that  
is in fact a complex adaptive system a global brain in which each of us plays a sometimes conscious sometimes unknowing  
role and he reveals that the World Wide Web is just the latest step in the development of this brain These are theories as  
important as they are radical Informed by twenty years of interdisciplinary research Bloom takes us on a spellbinding journey  
back to the big bang to let us see how its fires forged primordial sociality As he brings us back via surprising routes we see  
how our earliest bacterial ancestors built multitrillion member research and development teams a full 3.5 billion years ago  
We watch him unravel the previously unrecognized strands of interconnectedness woven by crowds of trilobites hunting  
packs of dinosaurs feathered flying lizards gathered in flocks troops of baboons making communal decisions and adventurous  
tribes of protohumans spreading across continents but still linked by primitive forms of information networking We soon find  
ourselves reconsidering our place in the world Along the way Bloom offers us exhilarating insights into the strange tricks of  
body and mind that have organized a variety of life forms spiny lobsters which during the Paleozoic age participated in  
communal marching rituals and bees which during the age of dinosaurs conducted collective brainwork This fascinating tour  
continues on to the sometimes brutal subculture wars that have spurred the growth of human civilization since the Stone Age  
Bloom shows us how culture shapes our infant brains immersing us in a matrix of truth and mass delusion that we think of as  
reality *Global Brain* is more than just a brilliantly original contribution to the ongoing debate on the inner workings of  
evolution It is a grand vision says the eminent evolutionary biologist David Sloan Wilson a work that transforms our very view

librarianship practitioners and scholars digitize exhibit and preserve their cultural heritage and how these practices may be
