## **Citizenship And The Environment:**

*Citizenship and the Environment* Andrew Dobson, 2003-11-27 This is the first book length treatment of the relationship between citizenship and the environment Andrew Dobson argues that ecological citizenship cannot be fully articulated in terms of the two great traditions of citizenship liberal and civic republican which have been bequeathed to us He develops an original theory of citizenship which he calls post cosmopolitan and argues that ecological citizenship is an example and an inflection of it Ecological citizenship focuses on duties as well as rights and these duties are owed non reciprocally by those individuals and communities who occupy unsustainable amounts of ecological space to those who occupy too little The first virtue of ecological citizenship is justice but post cosmopolitanism follows some feminisms in arguing that care and compassion may be required to meet its special obligations Dobson suggests that ecological citizenship s conception of political space is not the state or the municipality or the ideal speech community of cosmopolitanism but the ecological footprint Most governments around the world have signed up to sustainable development and they cannot afford to ignore ecological citizenship as a means of getting there Government policies usually revolve around financial sticks and carrots but these leave people uncommitted to the idea of sustainability and only to the rewards that are attached to it Dobson contrasts citizenship with fiscal incentives as a way of encouraging people to act more sustainably in the belief that the former is more compatible with the long term and deeper shifts of attitude and behaviour that sustainability requires Both citizenship and sustainability though are often viewed with suspicion in liberal societies because they refuse to accept the inviolability of individual preferences Dobson therefore offers an original account of the relationship between liberalism and sustainability arguing that the former s commitment to a plurality of conceptions of the good entails a commitment to so called strong forms of the latter How to make an ecological citizen Dobson examines the potential of formal high school citizenship education programmes through a case study of the recent implementation of the compulsory citizenship curriculum in the UK He concludes that the Department of Education and Skills has constructed a Trojan horse capable of kick starting ecological citizenship if teachers are willing and able to travel in it This book will be of interest to those working in the fields of environmental political theory citizenship globalisation cosmopolitanism liberalism and citizenship education

Environmental Citizenship Andrew Dobson, Derek Bell, 2005-12-02 Promoting environmental citizenship as a path to achieving sustainability encouraging people to act according to the public environmental good offers an alternative to the mainly market based incentives used by most governments today This book considers the theory and practice of environmental citizenship the obstacles to its realization and the opportunities it presents for bringing about environmental and social sustainability The multidisciplinary perspective drawing on work in sociology political theory philosophy psychology and education and the variety of approaches from high theory to ethnographic studies all converge on the relationship between citizenship and sustainability Placing environmental citizenship in the two thousand year tradition of

citizenship itself the book considers the nature possibilities and limits of citizenship as a way of promoting sustainability Part I considers the theory and practice of environmental citizenship what it is and how it can be achieved Part II examines obstacles and opportunities for environmental citizenship The book covers such topics as the necessity of an active role for the state the claims of environmental justice the democratic potential of online participation in rulemaking and the role of education in promoting environmental citizenship The multidisciplinary perspective and the combination of theory and practice make the book ideal for classroom use Citizenship, Environment, Economy Andrew Dobson, Angel Valencia Sáiz, 2005 This book examines the nature of environmental citizenship and the obstacles and opportunities involved in trying to develop it in liberal capitalist economies Environment and Citizenship Mark J. Smith, Doctor Piya Pangsapa, 2008-12-10 Citizenship and the environment are hotly debated as climate change places more responsibility on individuals and institutions in shaping policy Using new evidence and cases from across the globe Environment and Citizenship explores the new vocabulary of ecological citizenship and examines how successful environmental policy making depends on the responsible actions of citizens and civil society organizations as much as on governments and international treaties This accessible and thought provoking book provides a comprehensive and timely guide to the debates on environmental and ecological citizenship expertly combining examples of practice with theory examines how environmental movements have become increasingly involved in governance processes at the local national regional and intergovernmental levels explores the increasing importance of corporations and transnational networks through examples of stakeholding processes and participatory research in environmental decision making calls on researchers policy makers and activists to face a new challenge how to effectively link environmental justice with social justice Breaking new ground Smith and Pangsapa address how environmental responsibility operates through politics ethics culture and the everyday experiences of activists as well as how awareness of environmental and social injustice only leads to responsible actions and strategic change through civic engagement Citizenship and the Environment, 2003 *Environment and Citizenship* Benito Cao, 2015-03-05 The increasing awareness of the human impact on the environment is having a profound effect on the concept and content of citizenship one of the fundamental institutions that structures human relations In what is the first introduction of its kind this book provides an accessible stimulating and multidimensional overview of the many ways in which concern for the environment driven primarily by the preoccupation with sustainability is reshaping our understanding of citizenship Environment and Citizenship is structured into three parts Part I introduces the reader to the concept and theories of citizenship and explores the impact that environmental concerns is having on contemporary formulations of citizenship both traditional e g national liberal and republican and emerging e g cosmopolitan ecological and ecofeminist Part II explores the practical manifestations of environmental citizenship with each chapter focusing on a particular actor citizens governments and corporations These chapters include references to examples and case studies from a wide range of countries broadly

categorized as belonging to the Global North and the Global South Part III explores the making of green citizens and outlines the dominant articulations of environmental citizenship that emerge from formal education news media and popular culture The book concludes with a general reflection on the present and future of environmental citizenship The book contains a variety of illustrations boxed case studies links to online resources and suggestions for further reading This original and engaging text is essential reading for students and scholars of environmental politics sustainability studies and development studies as well as for environmental activists policy practitioners and environmental educators More broadly this book will appeal to anyone interested in and concerned with issues of sustainability social justice and citizenship in the twenty first century

Valencia, 2013-09-13 As governments around the world grapple with the challenge of delivering environmental sustainability attention has recently focused on the role that citizens should play in meeting the challenge In advanced industrial countries such as ours which operate in the political framework of liberal capitalism what relevance can we place on environmental citizenship This book looks at the obstacles and opportunities which exist within this context and examines the possibility of ethical investment the social economy and considers whether there is space in the capitalist economy for environmental citizens to do the right thing This book is a special issue of the leading journal *Environmental Politics*

*Environment and Citizenship in Latin America* Alex Latta, Hannah Wittman, 2012-07-20 Scholarship related to environmental questions in Latin America has only recently begun to coalesce around citizenship as both an empirical site of inquiry and an analytical frame of reference This has led to a series of new insights and perspectives but few efforts have been made to bring these various approaches into a sustained conversation across different social temporal and geographic contexts This volume is the result of a collaborative endeavour to advance debates on environmental citizenship while simultaneously and systematically addressing broader theoretical and methodological questions related to the particularities of studying environment and citizenship in Latin America Providing a window onto leading scholarship in the field the book also sets an ambitious agenda to spark further research

*Conceptualizing Environmental Citizenship for 21st Century Education* Andreas Ch. Hadjichambis, Pedro Reis, Demetra Paraskeva-Hadjichambi, Jan Činčera, Jelle Boeve-de Pauw, Niklas Gericke, Marie-Christine Knippels, 2020-02-26 This Open Access book is about the development of a common understanding of environmental citizenship It conceptualizes and frames environmental citizenship taking an educational perspective Organized in four complementary parts the book first explains the political economic and societal dimensions of the concept Next it examines environmental citizenship as a psychological concept with a specific focus on knowledge values beliefs and attitudes It then explores environmental citizenship within the context of environmental education and education for sustainability It elaborates responsible environmental behaviour youth activism and education for sustainability through the lens of environmental citizenship Finally it discusses the concept within the context of different educational levels such as primary and secondary education in formal and non formal settings

Environmental citizenship is a key factor in sustainability green and cycle economy and low carbon society and an important aspect in addressing global environmental problems It has been an influential concept in many different arenas such as economy policy philosophy and organizational marketing In the field of education the concept could be better exploited and established however Education and especially environmental discourses in science education have a great deal to contribute to the adoption and promotion of environmental citizenship Citizens for a Better Environment V. Macgregor,2011-11-01 Women s environmental activism is often described in maternalist terms as if motherhood and caring for the environment go hand in hand While feminists celebrate this connection women and all those who care for people and environments are facing increasing burdens and decreasing time for civic engagement In *Beyond Mothering Earth* MacGregor argues that celebrations of earthcare as women s unique contribution to the search for sustainability often neglect to consider the importance of politics and citizenship in women s lives Drawing on interviews with women who juggle private caring with civic engagement in quality of life concerns she proposes an alternative a project of feminist ecological citizenship that affirms the practice of citizenship as an intrinsically valuable activity while recognizing the foundational aspects of caring labour and natural processes that allow its specificity to flourish *Beyond Mothering Earth* provides an original and empirically grounded understanding of women s involvement in quality of life activism and an analysis of citizenship that makes an important contribution to contemporary discussions of green politics globalization neoliberalism and democratic justice It will be of value to scholars and activists interested in the politics of environmental sustainability and the shifting meanings of citizenship in an increasingly vulnerable world **Children, Citizenship and Environment**
