## City That Grew:

State of the World's Cities 2008/9 Un-Habitat,2012-05-04 Cities are perhaps one of humanity's most complex creations never finished never definitive They are like a journey that never ends Their evolution is determined by their ascent into greatness or their descent into decline They are the past the present and the future Cities contain both order and chaos In them reside beauty and ugliness virtue and vice They can bring out the best or the worst in humankind They are the physical manifestation of history and culture and incubators of innovation industry technology entrepreneurship and creativity Cities are the materialization of humanity's noblest ideas ambitions and aspirations but when not planned or governed properly can be the repository of society's ills Cities drive national economies by creating wealth enhancing social development and providing employment but they can also be the breeding grounds for poverty exclusion and environmental degradation The 21st Century is the Century of the City Half of humanity now lives in cities and within the next two decades 60 per cent of the world's people will reside in urban areas How can city planners and policymakers harmonize the various interests diversity and inherent contradictions within cities What ingredients are needed to create harmony between the physical social environmental and cultural aspects of a city and the human beings that inhabit it This report adopts the concept of Harmonious Cities as a theoretical framework in order to understand today's urban world and also as an operational tool to confront the most important challenges facing urban areas and their development processes It recognizes that tolerance diversity social justice and good governance all of which are inter-related are as important to sustainable urban development as physical planning It addresses national concerns by searching for solutions at the city level For that purpose it focuses on three key areas spatial or regional harmony which examines the main drivers of urban growth in the developing world and explores the spatial nuances of economic and social policies social harmony which presents and analyzes new data on urban inequalities worldwide and describes the types of shelter deprivations experienced by slum dwellers in developing world regions and environmental harmony which examines the role of cities in the climate change debate and the impact of global warming on the most vulnerable cities The report also assesses the various intangible assets within cities that contribute to harmony such as cultural heritage sense of place and memory and the complex set of social and symbolic relationships that give cities meaning It argues that these intangible assets represent the soul of the city and are as important for harmonious urban development as tangible assets Harmony within cities argues the report is both a journey and a destination Published with UN HABITAT

**Cities and Nature** Lisa Benton-Short, John Rennie Short, 2013-07-04 Cities and Nature illustrates how the city is part of the environment and how it is subject to environmental constraints and opportunities The city has been treated in geographical writings as only a social phenomena and at the same time environmental scientists have tended to ignore the urban This book reconnects the science and social science through the examination of the urban It critiques the dominant

academic discourse which ignores the environmental base of urban life and living and discusses the urban natural environment and how this is subjected to social influences The book is organized around three central themes urban environment in historical context issues in urban nature relations realigning urban nature relations Ideas such as pollution as a physical environmental fact often created or impacted by economic cultural and political changes are discussed as well as viewing pollution as a social act consuming patterns of everyday activities driving showering shopping eating and how this has an environmental impact The authors reintroduce a social science perspective in examining urban nature the city and its physical environment *Cities and Nature* clearly illustrates the physical and social elements of the urban environment and shows how these are important to examining the city It includes further reading and boxed case studies on Bangladesh Paris Delhi Rome Curitiba Thailand Los Angeles Chicago New Orleans and Toronto This book would be an asset to students and researchers in environmental studies urban studies and planning

**Redefining Urban and Suburban America** Alan Berube, Bruce Katz, Robert E. Lang, 2007-01-30 Results from Census 2000 have confirmed that American cities and metropolitan areas lie at the heart of the nation's most pronounced demographic and economic changes The third volume in the *Redefining Urban and Suburban America* series describes anew the changing shape of metropolitan America and the consequences for policies in areas such as employment public services and urban revitalization The continued decentralization of population and economic activity in most metropolitan areas has transformed once suburban places into new engines of metropolitan growth At the same time some traditional central cities have enjoyed a population renaissance thanks to a recent boom in living downtowns The contributors to this book probe the rise of these new growth centers and their impacts on the metropolitan landscape including how recent patterns have affected the government's own methods for reporting information on urban suburban and rural areas Volume 3 also provides a closer look at the social and economic impacts of growth patterns in cities and suburbs Contributors examine how suburbanization has affected access to employment for minorities and lower income workers how housing development trends have fueled population declines in some central cities and how these patterns are shifting the economic balance between older and newer suburbs Contributors include Thomas Bier Cleveland State University Peter Dreier Occidental College William Frey Brookings Robert Lang Virginia Tech Steven Raphael University of California Berkeley Audrey Singer Brookings Michael Stoll University of California Los Angeles Todd Swanstrom St Louis University and Jill Wilson Brookings
