When the Stakes Are High Vesna Danilovic, 2010-06-04 When the Stakes Are High is based on the premise that powers have continually played a decisive role in international conflicts Consequently one of the key questions concerns the conditions that are likely to trigger or abate dispute escalation into major power conflicts In this book Vesna Danilovic provides a rigorous theoretical and empirical analysis of these conditions Since the most precarious and common form of dispute between major powers arises over third nations the author's primary focus is on so called extended deterrence In this type of deterrence one side attempts to prevent another side from initiating or escalating conflict with a third nation When the Stakes Are High addresses such questions as When is extended deterrence likely to be effective What happens if deterrence fails In what circumstances is war likely to result from a deterrence failure The author's main argument is that a major power's national interests which shape the inherent credibility of threats and which are shaped by various regional stakes set the limits to the relevance of other factors which have received greater scholarly attention in the past Strongly supported by the empirical findings the arguments in this work draw important implications for conflict theory and deterrence policy in the post Cold War era This book will appeal to the reader interested in international relations in general and in theories of international conflict deterrence causes of wars great power behavior and geopolitics in particular Vesna Danilovic is Assistant Professor of Political Science Texas A M University *Archival Information* Steven
