Return of the Golden Age Edward F. Malkowski, 2013-12-17 The truth behind ancient myths and the return of the celestial conditions for a Golden Age of peace and abundance Reveals the events preserved in myth that launched humanity into 12 000 years of struggle selfishness and false beliefs Explores how we can initiate a new Golden Age through ancient Egyptian teachings on the creative power of our imaginations Explains how our world system of economics which benefits a few at the expense of the many arose as a reaction to global catastrophe in prehistory Since the beginning of recorded history humanity has been in a continuous struggle over land and resources It continues today despite the abundance we have created through scientific innovation and technology Why such a struggle for resources exists has never been explained Neither has the human drive to own accumulate and hoard Edward Malkowski reveals that the answer lies in recognizing the reality behind humanity's earliest myths He shows that the opportunity is at hand to transcend these inherited selfish traits and return to a Golden Age of peace and abundance Malkowski explores the hidden meaning behind stories such as the Epic of Gilgamesh Plato's Atlantis and myths of a new sky and a new sun of great floods and the death of the gods and of the preceding Golden Age He connects these myths to a real extinction event that occurred 12 000 years ago He explains how the survivors our ancestors were catapulted from utopia into a world of scarcity scarring the collective mind of humanity and initiating the struggle for resources in an attempt to regain our lost paradise He shows how our world system of economics focused on ownership and based on the false belief of separateness benefitting a few at the expense of the many arose as a reaction to this catastrophe Drawing on the pre catastrophe teachings preserved by the ancient Egyptians Malkowski reveals that we are returning to a celestial configuration parallel to that of the past Golden Age Through our collective DNA memory and the creative power of
