Aging Policy and Politics in the Trump Era Edward Alan Miller, Pamela Nadash, Michael Gusmano, 2020-05-21 The surprise election of Donald J Trump to the presidency of the United States marks a singular turning point in the American republic not only because of his idiosyncratic approach to the office but also because the Republican Party now holds the presidency and both houses of Congress presenting a historic opportunity for change The role of older Americans has been critical in both shaping and reacting to this political moment Their political orientations and behaviors have shaped it through their electoral support for Republican candidates But older Americans stand as highly invested stakeholders in the policy decisions made by the very officials they elected and as beneficiaries of the programs that Republicans have targeted for cuts or elimination This comprehensive volume explores the ways in which Trump administration policies are likely to significantly undermine the social safety net for near elderly and older Americans including long term care housing health care and retirement The authors also explore how the Trump administration might shape politics and political behavior through the policy changes made The response of older voters in upcoming elections to efforts by the Trump administration and its Republican allies in Congress to draw back on the federal government's commitment to programs and policies affecting them will shape the direction of aging policy and politics for years to come This book was originally published as a special issue of the *Journal of Aging Social Policy*

Albania International Monetary Fund. European Dept., 2024-01-12 The Albanian economy has emerged as one of the stronger performers in the region The rising role of tourism has boosted confidence in the country's prospects a factor partly reflected in the steady appreciation of the lek While growth is moderating it is expected to remain robust at around 31.2 and 31.4 percent respectively in 2023 and 2024 Inflation is gradually declining though it remains above the central bank's target amid tight labor markets Medium term prospects however are constrained by structural challenges including shortfalls in the rule of law and emigration pressures *OECD Environmental Performance Reviews: Germany 2023* OECD, 2023-05-08 Germany has continued to improve its environmental performance over the past decade It has ambitious climate targets with the aim to reach climate neutrality by 2045 and achieve negative emissions after 2050

Glacial Chelsea Henderson, 2024-08-06 It took nearly sixty years for a meaningful climate change bill to run the political gauntlet from Capitol Hill to the Oval Office Why From mavericks to party standard bearers U S Senators members of the House of Representatives and presidential candidates have campaigned for four decades espousing their intentions to address the impacts of climate change *Glacial The Inside Story of Climate Politics* is the first Inside the Beltway account to lay bare the machinations of what went wrong in Washington how and why our leaders failed to act on climate change as mounting scientific evidence underscored the urgency to do so *Glacial* tells a story of behind the scenes infighting and power struggles that blocked or derailed federal legislative progress on climate change even in times of bipartisanship and with polls showing most Americans favored action The good news today is that public

opinion is at its highest level of support for climate action from corporate boardrooms embracing sustainability for business reasons to movements led by passionate younger generations who can't afford to stand mute because it is they who will inherit the worst environmental catastrophes. If the missed opportunities in Washington are instructive, the path to doing so is clear. Our elected officials must use their offices not solely for the power and prestige it bestows upon them personally but for the public good and they must do so while there is still time.

OECD Health Policy Studies Realising the Potential of Primary Health Care OECD, 2020-05-30. This report examines primary health care across OECD countries before the COVID-19 pandemic and draws attention to how primary health care is not living up to its full potential. Doing things differently through new models of organising services, better coordination among providers, better use of digital technology and better use of resources and incentives helps to improve care, reduce the need for hospitalisations and mitigate health inequalities.
