Farrell,2014-07-15 Loved and hated visited and avoided seemingly everywhere yet endlessly the same malls occupy a special place in American life What then is this invention that evokes such strong and contradictory emotions in Americans In many ways malls represent the apotheosis of American consumerism and this synthetic and wide ranging investigation is an eye popping tour of American culture s values and beliefs Like your favorite mall One Nation under Goods is a browser s paradise and in order to understand America s culture of consumption you need to make a trip to the mall with Farrell This lively fast paced history of the hidden secrets of the shopping mall explains how retail designers make shopping and goods irresistible Architects chain stores and mall owners relax and beguile us into shopping through water fountains ficus trees mirrors and covert security cameras From food courts and fountains to Santa and security Farrell explains how malls control their patrons and convince us that shopping is always an enjoyable activity

And most importantly One Nation Under Goods shows why the mall's ultimate promise of happiness through consumption is largely an illusion. It's all here for one low price of course.

Shopping Malls and Public Space in Modern China

Nicholas Jewell, 2016-03-03 China's rise as an economic superpower has been inescapable. Statistical hyperbole has been accompanied by a plethora of highly publicized architectural forms that brand the regeneration of its increasingly globalized urban centres. Despite the sizeable body of literature that has accompanied China's modernization, the essence and trajectory of its contemporary cityscape remains difficult to grasp. This volume addresses a less explored aspect of China's urban rejuvenation: the prominence of the shopping mall as a keystone of its public spaces. Here, the presence of the built form most representative of Western capitalism's excess is one that makes explicit the tensions between China's Communist state and its ascent within the free market. This book examines how these interrelationships are manifested in the culturally hybrid built form of the shopping mall and its role in contesting the public space of the modern Chinese city. By viewing these interrelationships as collisions of global and local narratives, a more nuanced understanding of the shopping mall typology is explored. Much architectural criticism has failed to address the levels of meaning implicit within the shopping mall, yet it is a building type whose public popularity has guaranteed its endurance. Consequently, if architecture is to remain a relevant social art, a more holistic understanding of this phenomenon will be indispensable to the process of adapting to globalizing forces. This examination of Chinese shopping malls offers a timely and relevant case study of what is happening in all our cities today.

El Mall

Arlene Dávila, 2016-01-05 While becoming less relevant in the United States, shopping malls are booming throughout urban Latin America. But what does this mean on the ground? Are shopping malls a sign of the region's coming of age? *El Mall* is the first book to answer these questions and explore how malls and consumption are shaping the conversation about class and social inequality in Latin America. Through original and insightful ethnography, Dávila shows that class in the neoliberal city is increasingly defined by the shopping habits of ordinary people. Moving from the global operations of the shopping mall industry to the experience of shopping in places like Bogotá, Colombia, *El Mall* is an indispensable book for scholars and students interested in consumerism and neoliberal politics in Latin America and the world.
