This handbook gives all professionals ready access to the specific guidelines, practice techniques, protective factors, and resilience case study applications and crisis intervention strategies that are most appropriate for maximizing opportunities for rapid assessment and crisis resolution. Now expanded and fully updated, *Crisis Intervention Handbook: Assessment, Treatment, and Research*, Second Edition, focuses on crisis intervention services for persons who are victims of natural disasters, school-based and home-based violence, violent crimes, and personal or family crises. Consisting of five parts, it covers a broad array of subjects including psychiatric emergencies, medical crises, community-wide disasters, and high school shootings. Part I provides an overview; Part II addresses crisis assessment and intervention models for children and youths; Part III explores crisis intervention and prevention for victims of violence; Part IV describes crisis assessment and intervention in health and mental health-related crises; and Part V focuses on research and outcome studies on the effectiveness of crisis intervention programs.
