

Critical density

Density parameter:

$$\Omega_0 = \frac{8\pi G\rho_0}{3H_0^2}$$

- $\Omega_0 > 1$: spherical universe, closed
- $\Omega_0 = 1$: parabolic (flat) universe, open
- $\Omega_0 < 1$: hyperbolic universe, open

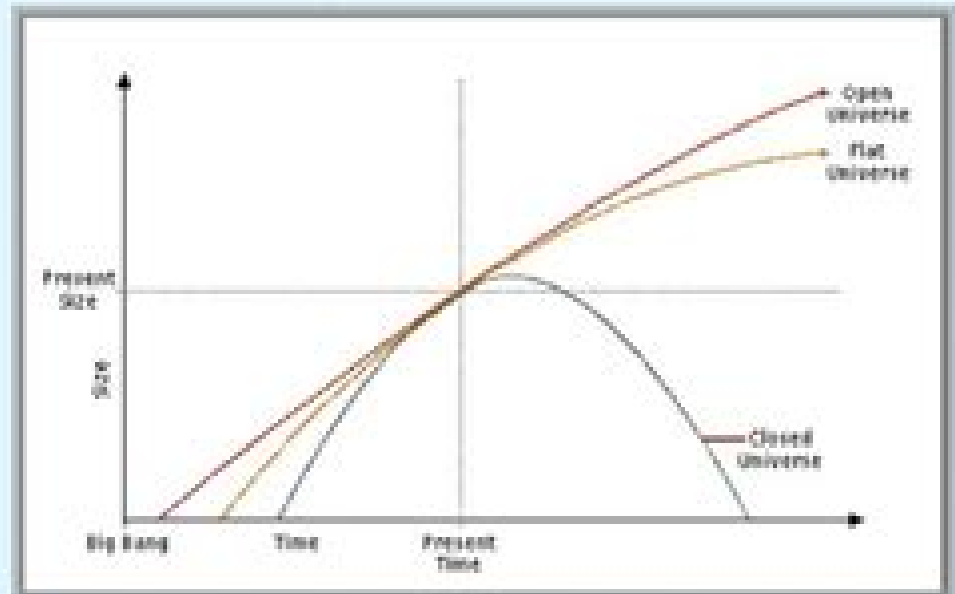

} $\Lambda = 0$

→ matter density determines the fate of the Universe

Best estimates:

$$\Omega_{m,0} \approx 0.3$$

Critical Cosmology

Archibald Alfred Egles Weir

Critical Cosmology:

Topological Geometrodynamics Matti Pitkanen, 2006-05 Topological Geometrodynamics is a modification of general relativity inspired by the conceptual problems related to the definitions of inertial and gravitational energy in general relativity Topological geometrodynamics can be also seen as a generalization of super string models Physical space times are seen as four dimensional surfaces in certain eight dimensional space The choice of this space is fixed by symmetries of the standard model so that geometrization of known classical fields and elementary particle quantum numbers results The notion of many sheeted space time allows re interpretation of the structures of perceived world in terms of macroscopic space time topology The generalization of the number concept based on fusion of real numbers and p adic number fields implies a further generalization of the space time concept allowing to identify space time correlates of cognition and intentionality Quantum measurement theory extended to a quantum theory of consciousness becomes an organic part of theory A highly non trivial prediction is the existence of a fractal hierarchy of copies of standard model physics with dark matter identified in terms of macroscopic quantum phases characterized by dynamical and quantized Planck constant The book is a comprehensive overview and analysis of topological geometrodynamics as a mathematical and physical theory

Quantization and Discretization at Large Scales Florentin Smarandache, V. Christianto, Pavel Pintr, 2012 **The Critical Philosophy of Immanuel Kant** Caird, 1889 *The Routledge Critical Dictionary of the New Cosmology* Peter Coles, 1999 We have entered the Golden Age of Cosmology where modern technology is allowing scientists to chart the cosmos to a depth and precision unimaginable until recent years The amassing of this new data has had a profound impact on our understanding of the origin and evolution of the universe The Routledge Critical Dictionary of the New Cosmology is designed to be your guide through this exciting period The clear concise essays by leading cosmologists provide introductions to various aspects of the subject and allow new developments to be placed in context The essays are cross referenced to an alphabetical dictionary giving in depth explanations of key words and concepts as well as biographical entries on the major figures in cosmology This volume can be used to focus on a particular theme or to explore the big picture **Critical Cosmology** Gérard Raulet, 2005-01-01 Globalization is more than an economic or geopolitical matter it is above all a new political culture Like the Kantian revolution in the 18th century our global moment urgently requires philosophical inquiry to determine if it represents a 20th century revolution in thinking Critical Cosmology takes up the task of establishing the much needed philosophical tools to think globalization by reading Kant's re foundation of cosmopolitanism as a political not moral text Raulet in committing himself to a close study of this late capitalist global moment gets us to a much needed cosmology of 21st century globalization The world's economic evolution has continually challenged some of our most basic modern concepts especially the recognition of the rights of nations This evolution has also created a need for recognizing the rights of citizens and others participating in the growth of the world's economies In neither the service of a

prescriptive morality nor in the service of any one specific cultural political or intellectual ideology Gerard Raulet investigates the construction of a public space that can accommodate global citizenship Through a unique and massive genealogy of political thinkers Raulet like no other contemporary critic begins the process of carving out the social cultural and political space that will come to accommodate the common activity of an emerging global culture A brilliant and unique investigation of our contemporary political moment this will affect political thinkers of every variety and especially those who are concerned with conflict and peace studies the development of nations and nation states and human rights on a national and international scale
