This Book Contains Deadly Reptiles** Corey Tutt, Ben Williams, 2025-02-04 This is the ultimate children's science book by DeadlyScience founder Corey Tutt bestselling author of The First Scientists Bursting with vibrant illustrations and cool facts about more than 60 reptiles Corey celebrates First Nations knowledge about animals found on Country from lizards and snakes to turtles and crocodiles As a child Corey would run barefoot across fields climb rocks jump into creeks and explore red sands in search of reptiles The only reference books he could find included European and Latin names but as a Kamilaroi man Corey was keen to learn reptile names in First Languages Sharing knowledge from 20 different First Nations Caution

This Book Contains Deadly Reptiles is a reptile book unlike any you've seen before. For each reptile featured, you'll discover its name in a First Language, plus learn about favourite feeds, breeding and babies, conservation, predators and prey, and most importantly, what makes that reptile deadly in a good way. There are also descriptions of the landscapes where you can spot these reptiles, and Ben Williams' colourful illustrations will have you turning every page in wonder. The amazing facts in this book will astound you. Did you know that a central bearded dragon's beard can change colour to protect it from predators? Or that the temperature of a turtle egg nest determines if the baby turtles will be boys or girls? Or that some First Nations names for reptiles can be more scientifically accurate than the European names, such as the common death adder that is more closely related to a brown snake than an adder? Corey will introduce you to this incredible world of reptiles, which may be deadly in more ways than one.
