Crossborder Health Insurance Options For Texas:

Cross-border Health Insurance, 2004 *The Health of Aging Hispanics* Jacqueline L. Angel, Keith E. Whitfield, 2007-08-06 The emergence of the Hispanic population in the United States and the increasing profile of Latin America on the North and South American continents have raised the profile of Latino issues in the American consciousness. Much of this attention however has revolved around trends in culture, art, food, and music, or pathological concerns about poverty, crime, drugs, and immigration. At best, the scholarly and policy assessments of the implications of the impact of Latinos in the United States revolve around Mexican Americans, Puerto Ricans, and Central Americans, as well as the children of an older Cuban population and their struggles to achieve a measure of education, healthcare, employment, and civil rights. What have not been adequately addressed are the demographic trends affecting Latinos in the United States, Mexico, and Latin America, particularly the aging of the Hispanic population and its resultant health and long-term care needs. That Latinos are living longer and shifting from a youthful population to an increasingly older cohort is little known, except among the small cadre of Hispanic gerontologists. Ironically, this invisibility of aging Hispanics is juxtaposed to the almost picketed response of the U.S. media and public toward the aging of the general U.S. population and the social and political controversies over Social Security, Medicare, and health care costs. The policy debates of an aging U.S. population as a whole arise from substantial research and policy analysis, a level of attention not seen with regard to the aging of the Hispanic population. *Public Health and Information Technology at the United States-Mexico Border*, 2007 *Health Care and Immigration* Patricia Fernández-Kelly, Alejandro Portes, 2013-10-31 This pioneering volume represents the culmination of state-of-the-art research whose purpose was to investigate the relationship between health care and immigration in the USA, two broken systems in need of reform. This volume sets out to answer the question: how do medical institutions address the needs of individuals and families who are poor, lacking English fluency, and often devoid of legal documents? The book provides an examination of the challenges faced by institutions aiming to serve impoverished people and communities desperately in need of help. It represents a comprehensive portrayal of two institutional arrangements affecting the lives of millions on a daily basis: Health Care and Immigration. It offers accounts of the alternative paths used by immigrants to bypass dominant health care organizations and regional variations in health care, the evolution and character of health care legislation, factors explaining the persistence of altruistic institutions in a market economy, as well as the parts played by local legislation and social networks and changes resulting from migration that affect the health of immigrants. This volume will be an invaluable resource for academics, researchers, and students, as well as public officials addressing the health care needs of disadvantaged groups. This book was originally published as a special issue of *Ethnic and Racial Studies*. **Annual Review of Gerontology and Geriatrics, Volume 25, 2005** Toni Miles, Antonio Furino, 2005-11-18 This volume of the *Annual Review of Gerontology and Geriatrics* helps readers see the local problem and concern of aging as a global epidemic affecting all
