## **At New Materiality I:**

*The Oxford Guide for Writing Tutors* Melissa Ianetta, Lauren Fitzgerald, 2016 *The Oxford Guide for Writing Tutors* introduces two conversations to the tutor's preparation: one about the creation of knowledge in writing programs, the other about tutor research. This approach to tutor training provides several benefits. First, it allows tutors to test their theories of what might work in a writing center session and helps them to move professional conversation towards why such things happen. They bridge the theory-practice divide that often frustrates both novices and experienced tutors. By conducting research to answer such questions, tutors can help themselves, the writers with whom they work, their fellow tutors, and the writers with whom they work. And further, this approach gives the reader new methods for appreciating and critiquing scholarly work, making it easier to understand the best ways to help writers and to move the field forward. As writing tutoring programs take on a variety of forms and pursue a range of missions, this book aims to create a flexible text whose contents can be easily rearranged to support a broad spectrum of reader needs. Each chapter accordingly can be read independently; the text does not rely on a sequential reading to create meaning. The book also includes intra-textual and extra-textual references for the reader who wants to inquire further. That is, throughout the book are references to material in other chapters that might be of interest to the reader intrigued by the topic at hand. So too, in each chapter we include references to and citations of the scholarship that supports much of the common knowledge of the field, including in the Handbook both previous tutor education textbooks and research from the field. The aim is to aid the interested reader's inquiry into the scholarship of the field as well as to ground advice about practice in research that testifies to the effectiveness of a range of tutoring practices. Much of the scholarship cited throughout the book is authored by undergraduate tutor researchers as well as several former tutors who were graduate students when they published their articles. This crucial aspect best models the ways in which tutors themselves can bring together practice and research in their day-to-day work and in their informed thinking about this work. Including tutor voices is an important tradition of the tutor education textbook because these are voices that speak to the issues concerning tutors in a range of institutions and programs across the country.

**The Possibility of (an) Architecture** Mark Goulthorpe, 2009-06-02. Articulating a radical agenda for the rethinking of the basic precepts of the construction industry in light of digital technologies, this book explores the profound shift that is underway in all aspects of architectural process. Essays and lectures from the last fifteen years discuss these changes in relation to dECOi Architects, created in 1991 as a forward-looking architectural practice. This excellent collection is relevant to architectural professionals, academics, and students, and also to practitioners in many related creative fields who are similarly engaged in trying to comprehend the significance of the import of digital media.

**Learning English at School** Kelleen Toohey, 2018-05-25. This fully revised edition provides a comprehensive discussion of how insights and concepts from new materialism and posthumanism might be used in investigating second language learning and teaching in classrooms.

Alongside the sociocultural and poststructural perspectives discussed in the first edition this new book presents insights from new materialism on identity second language learning and pedagogical practices This application of new theory deepens our understanding of how minority language background children learn English in the context of their classrooms The author comprehensively explains the new materiality perspectives and suggests how research from this perspective might provide new insights on second language learning and teaching in classrooms The book is unique in analysing empirical classroom data from a sociocultural but also a new materiality perspective and has the potential to change our understandings of research and pedagogical practices
