Crises In Modern Thought:

Crises in Modern Thought J. Donald Walters, 1988 *Crises in Modern Thought* is completely in harmony with the findings of modern science Yet it provides them with deep meaning This message must be spread everywhere Leon Kolb anthropologist Stanford Professor Emeritus The scientific advances of the last century have in some ways also introduced a sense of meaninglessness into modern life As the scientific principle of relativity has become widely accepted traditional values have been greatly weakened *Crises in Modern Thought* shows how science and values are in fact completely compatible Working with accepted scientific theories *Crises* shows how science and the basic moral values of society enrich each other

CRISES IN MODERN THOUGHT SWAMI KRIYANANDA, 1972 **Crises in Modern Thought** Swami Kriyananda, 1972 **Crisis and the Culture of Fear and Anxiety in Contemporary Europe** Carmen Zamorano Llena, Jonas Stier, Billy Gray, 2023-08-01 The accrument of crises over the last two decades with their particular manifestations in the European context has evoked the feeling of living in exceptional times as captured in the recurrent claim that we live in the age of anxiety The main aim of this collection is to analyse from a multidisciplinary perspective the causes and consequences of the current dominance of the discourse of fear anxiety and crisis through the experience of distinct and often interdependent moral panics in twenty first century Europe With its multidisciplinary approach this volume sheds light on the need to view the interrelationship between different crises and their associated affects as crucial in attaining a more nuanced understanding of the aetiology and effects of the current age of anxiety This multidisciplinary scrutiny of the interrelationship of twenty first century fears anxiety and crises signals an original engagement with these complex phenomena in order to make their emergence and profound effects on contemporary society more comprehensible The timeliness of the thematic focus and the rigorous in depth analyses make this collection relevant to students and academics within the fields of sociology literary and cultural studies political science and anthropology as well as to those in European studies and global studies

The Apocalyptic Dimensions of Climate Change Jan Alber, 2021-09-07 Climate change and the apocalypse are frequently associated in the popular imagination of the twenty first century This collection of essays brings together climatologists theologians historians literary scholars and philosophers to address and critically assess this association The contributing authors are concerned among other things with the relation between cultural and scientific discourses on climate change the role of apocalyptic images and narratives in representing environmental issues and the tension between reality and fiction in apocalyptic representations of catastrophes By focusing on how figures in fictional texts interact with their environment and deal with the consequences of climate change this volume foregrounds the broader social and cultural function of apocalyptic narratives of climate change By evoking a sense of collective human destiny in the face of the ultimate catastrophe apocalyptic narratives have both cautionary and inspirational functions Determining the extent to which such narratives square with scientific knowledge of climate change is one of the main aims

of this book **Constructing Crisis** Bert Spector,2019-09-05 Crises aren t real objective events Instead Spector demonstrates they are claims of urgency imposed by leaders to assert power and exert control **Critique and Crisis** Reinhart Koselleck,2000-03-13 Critique and Crisis established Reinhart Koselleck s reputation as the most important German intellectual historian of the postwar period This first English translation of Koselleck s tour de force demonstrates a chronological breadth a philosophical depth and an originality which are hardly equalled in any scholarly domain It is a history of the Enlightenment in miniature fundamental to our understanding of that period and its consequences Like Tocqueville Koselleck views Enlightenment intellectuals as an uprooted unrealistic group of onlookers who sowed the seeds of the modern political tensions that first flowered in the French Revolution He argues that it was the split that developed between state and society during the Enlightenment that fostered the emergence of this intellectual elite divorced from the realities of politics Koselleck describes how this disjunction between political authority proper and its subjects led to private spheres that later became centers of moral authority and eventually models for political society that took little or no notice of the constraints under which politicians must inevitably work In this way progressive bourgeois philosophy which seemed to offer the promise of a unified and peaceful world in fact produced just the opposite The book provides a wealth of examples drawn from all of Europe to illustrate the still relevant message that we evade the constraints and the necessities of the political realm at our own risk Critique and Crisis is included in the series Studies in Contemporary German Social Thought edited by Thomas McCarthy **History of Political Philosophy** Leo Strauss,Joseph Cropsey,2012-06-15 Designed for undergraduate students a historical survey of the most important political philosophers in the Western tradition This volume provides an unequalled introduction to the thought of chief contributors to the Western tradition of political philosophy from classical Greek antiquity to the twentieth century Written by specialists on the various philosophers this third edition has been expanded significantly to include both new and revised essays Crises in Modern Thought Swami Kriyananda,1972

Turning the Tables on Apologetics Jeffrey L. Hamm,2018-05-22 Does apologetic method matter Helmut Thielicke argues that the method should conform to its own message He thus rejects traditional apologetic methodologies beholden to supposedly neutral scientific and philosophical paradigms Seeking to reform Christian conversation Thielicke discovers a lost way of persuasion that is the table turning approach found in Christ s conversations Whenever Jesus is questioned he seldom answers directly For he refuses to allow the conversation to be framed by an autonomous mindset and instead responds with a counterquestion Christ s style of persuasion as the controller of the question subverts his hearers presuppositions and challenges their unbelief This approach is the reverse of the defensive answer giving mode of traditional apologetics In view of renewing Christ s method Thielicke insists that the task of apologetics is something which is always on the offensive and far from giving ready made answers to the doubtful questions of men turns the tables by putting questions on its own account aggressive violent radical questions and striking straight to the hearts of men Christian conversation must integrate Christ s

method with his message in order to advocate the message itself For it is not the world that questions Christ but rather Christ questions the world *The Rebirth of Orthodoxy* Thomas C.
