## **Crisis In Marxism:**

**Marxism and the Global Financial Crisis** Hillel Ticktin, 2013-09-13 The book discusses the nature of Marxist theory of crisis and applies it to the global financial crisis which began in 2007 Is the contemporary crisis simply the usual periodic upturn and downturn or is there something more fundamental Is there a structural crisis of capitalism from which there is no immediate solution Is capitalism managed and does it have a strategy Is the financial crisis representative of a failure in capitalism itself to subject banks and other financial institutions to the overall economy The book discusses Marx's view on crises as well as ideas on money and finance It considers the different modern Marxist ideas on the causes of crises falling rate of profit disproportionality and underconsumption It goes into detail as to the nature of the present crisis its course and causes in a spirited and independent manner Apart from the United States it considers the situation in the two countries in which protests erupted Iran and Greece They are taken as examples of the effect of the crisis on the country the society and the economy as well as its politics This book was originally published as a special issue of Critique

**The Crisis in Marxism** Jack Lindsay, 1981 *Marx's Theory of Crisis* Simon Clarke, 2016-07-27 The theory of crisis has always played a central role within Marxism and yet has been one of its weakest elements Simon Clarke's important new book provides the first systematic account of Marx's own writings on crisis examining the theory within the context of Marx's critique of political economy and of the dynamics of capitalism The book concentrates on the scientific interpretation and evaluation of the theory of crisis and will be of interest to mainstream economists as well as to sociologists political scientists and students of Marx and Marxism

*Herbert Marcuse and the Crisis of Marxism* Douglas Kellner, 1984 Critical overview of the entirety of Marcuse's work and discusses his enduring importance Kellner had extensive interviews with Marcuse and provides hitherto unknown information about his road to Marxism his relations with Heidegger and Existentialism his involvement with the Frankfurt School and his reasons for appropriating Freud in the 1950s In addition Kellner provides a novel interpretation of the genesis and structure of Marcuse's theory of one dimensional society of the development of his political theory and of the role of aesthetics in his critical theory

*Historical Materialism and the Economics of Karl Marx* Benedetto Croce, 1914 It is often said that it is the business of philosophy to examine and criticise the assumptions of the sciences and philosophy claims that in this work it is not an unnecessary meddler stepping in where it is not wanted For time and again for want of philosophical criticism the sciences have overstepped their bounds and produced confusion and contradiction

*Social Theory and the Crisis of Marxism* Joe McCarney, 1990 It is frequently asserted that Marxism as an intellectual tradition is in a state of crisis The many defeats and disappointments suffered by socialist movements in the West and the absence of a working model of a fully achieved socialist society have prompted much self questioning In recent times various strands of post Marxist thought have developed which surrender the ideological initiative to the radical right This philosophical reinterpretation of Marxism seeks to explain the nature and historical origins of the current crisis and to point

a way forward to rebirth McCarney argues that there are neglected truths about Marxism which need urgently to be restated Rejecting the dominant interpretation that theory is essentially a critique of capitalist society he reaffirms the classical Marxist model in which socialist theory uncovering a rational order emergent within existing society reveals to the agents of socialist change their historical role McCarney s meticulous analysis systematically examines the relationship between theory critique and social agency to be found in classical Marxism in the work of such leading Marxists as Lukacs Adorno and Althusser and in the recent analytical realist accounts of Marxist theory The book concludes that theoretical as well as social or political advance depends upon the fate of the new proletarian movements and identifies the developments in philosophy and political economy which are needed to ensure that Marxism remains a living intellectual force in the contemporary world

**The Theoretical System of Karl Marx in the Light of Recent Criticism** Louis Boudianoff Boudin,1907 [Socialism and Philosophy](#) Antonio Labriola,1906 [Marxism Today](#) ,1983 [The International Socialist Review](#) ,1914 [World in Crisis](#) Guglielmo Carchedi,Michael Roberts,2018-10-01 Most mainstream economists view capitalism s periodic breakdowns as nothing more than temporary aberrations from an otherwise unbroken path toward prosperity For Marxists this fundamental flaw has long been acknowledged as a central feature of the free market system This groundbreaking volume brings together Marxist scholars from around the world to offer an empirically grounded defense of Marx s law of profitability and its central role in explaining capitalist crises [World in Crisis](#) has a specific aim to provide empirical validity to the hypothesis that the cause of recurring economic crises or slumps in output investment and employment in modern economies can be found in Marx s law of the tendential fall in the rate of profit Marx believed and we agree that this is the most important law in political economy from the preface [China And The Crisis Of Marxism-leninism](#) Franz Michael,2019-04-11 Is the failure of communism in China inevitable So argue the authors of [China and the Crisis of Marxism Leninism](#) who believe that Mao s programs were utopian fantasies that greatly aggravated the incurable flaws of the Stalinist order now eroding worldwide At the time of the death of Mao Zedong in 1976 China was in a state of disarray and the [International Socialist Review](#) Algie Martin Simons,Charles H. Kerr,1903 [Socialist Thought and Practice](#) ,1983 [Global Capitalism in Crisis](#) Murray E. G. Smith,2010 The world economy is currently experiencing a devastating slump not seen since the Second World War Unemployment rates are skyrocketing and salaries are plummeting in the developed world while astronomical food prices and starvation ravage the developing world The crisis in global capitalism Smith argues should be understood as both a composite crisis of overproduction credit and finance and a deep seated systemic crisis Using Marx to analyze the origins implications and scope of the current economic slump this book argues that the crisis needs to be understood structurally as the result of a system prone to crisis rather than as an aberration Publisher s website [Rethinking Marxism](#) Karl Marx,Harry Magdoff,Paul Marlor Sweezy,Stephen A. Resnick,Richard D. Wolff,1985 [Classical Marxism in an Age of Capitalist Crisis](#) William Briggs,2019-03-14 Will capitalism survive forever Capitalism has

always lived in and with crisis Wars revolutions economic depression and repeated recessions the threat of nuclear annihilation and ecological disaster have all failed to break the dominance of this economic and political system Challenging the predominance of capitalism in a world fraught with inequalities this book returns to classical Marxism to reaffirm its relevance It explores the contradictions within capitalism as well as explains why Marxism has been unable to mount a sustained challenge to capitalism In order to explore concrete alternatives in a period of increasing capitalist globalisation and crisis it goes on to present perspectives by which theory and practice might be reunited to building independent political and organisational structures A search for something better this volume will be an engaging read for scholars and researchers of politics especially political theory and political economy economics and sociology

The Politics of Ecosocialism Kajsa Borgnäs, Teppo Eskelinen, Johanna Perkiö, Rikard Warlenius, 2015-07-24 As the global economy seeks to recover from the financial crisis and warnings about the consequences of climate change abound it is clear that we need a fundamentally new approach to tackle these issues This innovative book offers a unique perspective stressing the necessity of both ecological and social change as it discusses how to create a red green or eco socialist society Examining the current crises of welfare capitalism as well as the challenges and conflicts of an eco socialist society the book proposes a new social order that would combine the ideals of egalitarianism and of environmental sustainability It analyses the key social and ecological issues related to the welfare state including green Keynesianism ecological Marxism the limits of growth and no growth capitalist barriers to a renewable energy transition proposals for a universal basic income and the role of technology Finally the book outlines possible paths of transformation towards creating an eco socialist society drawing out lessons that can be applied internationally This book will be of great interest to students and researchers in economics environmental studies and political science

Marxism and the Proletariat Stephen Perkins, 1993 In an unusual approach to Marxist studies Perkins uses the category of the proletariat as the key to which to demarcate different schools of thought within Marxism and consequently to assess their degree of fidelity to Marx's own thought He examines the contribution to this perspective made by Lukacs and demonstrates how Lukacs is able to account for the apparent failure of Marxism in the political conditions of advanced capitalism

**Confronting Capitalism in the 21st Century** Marc Silver, 2019-04-23 This book analyzes key aspects of Marx's Capital with an eye towards its relevance for an understanding of issues confronting us in the 21st Century The contributions to this volume suggest that while aspects of Marx's original analysis must be adjusted to take into account changes that have occurred since its initial publication in 1867 his overall perspective remains necessary for understanding the nature of crises in 21st century Part I emphasizes the central concepts Marx employed in Capital including exploitation capital accumulation commodity fetishism and his use of dialectics as a method for baring the underlying relations that define capitalism Parts II and III extend that focus by addressing the concept of value fictitious capital credit and financialization Parts IV and V offer analyses of several concrete manifestations of contemporary crises from national

contexts Europe Latin America China and the United States The volume argues that we have to combat the imperatives of capitalism to move towards a more humane and egalitarian future
