Critical Memory Houston A. Baker, 2001 From the lone outcry of Richard Wright s Black Boy to the chorusing voices of Louis Farrakhan s Million Man March Critical Memory looks across the past half century to assess the current challenges to African American cultural and intellectual life As Houston A Baker recalls his own youth in Louisville Kentucky and Washington D C he situates such figures as Ralph Ellison James Baldwin Shelby Steele O J Simpson Chris Rock and Jesse Jackson within such issues as the embattled state of African American manhood and the financing and promotion of black intellectuals The memory of the book s title is doubly critical It is imperative Baker says that we keep alive the embarrassing macabre and always bizarre memory of race in America In another respect the remembering must be pointed and keen enough to discern truth from its often highly politicized commercialized trappings Throughout the book Baker returns again and again to the triad of race likability the compromises by which one gains credibility in white America and clearance the separation of blacks from the rights spaces and privileges of American citizenship These concepts Baker argues gird the meritocracy still in force that claimed progress in granting black men like his father the freedom to work themselves to death behind a desk instead of a mule In Critical Memory reason and cool rage converge to expose the draining tasks of reconciling white America s perception of its righteousness with its lack of relish for the truth it claims to welcome from black intellectuals and artists
