Critical Evaluations Of Economic Development Policies:

Critical Evaluations of Economic Development Policies Laura Ann Reese, David Fasenfest, 2004 This groundbreaking text offers alternative models for critical evaluation of the values behind and the success of local level economic development policies The values that shape present day economic development policies are often not plainly expressed Critical Evaluations of Economic Development Policies shows how the use of nontraditional methods of evaluation can foreground the values that inform public policy and determine whether or not those values and the policies that arise from them are in the best interests of the community that adopts them The methodology defined in this book not only provides means for judging the success or failure of economic development programs but also offers tactics for judging how well policies address needs according to a community's own value system The essays in Critical Evaluations of Economic Development Policies establish critical models illustrate how such models may be applied and show how evaluations of a single program made from the perspectives of differing value systems lead to different conclusions about the success or failure of the program In doing so these essays demonstrate the crucial importance of continuing dialogue between those who make policies and those who assess them This dynamic collection proposes to stimulate discussion among scholars developers and urban administrators to build awareness of the ways to foster completely informed policies and evaluate their outcomes

Washington Consensus, The: A Critical Evaluation Of The Principles And Implications For Economic Development Imad A Moosa, 2021-07-02 The objective of the book is to evaluate critically the ten principles of the Washington Consensus which govern the conditionality provisions of the IMF and World Bank and guide the so called economic reform in developing countries The book starts with an overview of the Consensus followed by a chapter on IMF conditionality and how they are related Since the Consensus is inherently neoliberal a chapter is devoted to a critique of the free market doctrine and the concept of economic freedom as seen by free marketeers The ten principles of the Washington Consensus referred to as the ten commandments are divided into four groups fiscal reform interest and exchange rate policies liberalization of trade and foreign direct investment and privatization and deregulation including property rights The book is written in the normative tradition of what ought to be as opposed to the positive tradition of what is While it may be tempting to describe the work as polemic the underlying issues contain such a significant moral component that pretending to be neutral would be a betrayal of justice and morality In essence the arguments put forward in the book are intended to dismantle discredit and debunk a set of principles that are effectively used to loot developing countries

Critical Urban Studies Jonathan S. Davies, David L. Imbroscio, 2010-11-03 This volume revisits the tradition of critical scholarship characteristic of the urban studies field Urban scholarship has had detractors of late particularly in mainstream political science where it has been accused of parochialism and insularity Critical Urban Studies offers a sharp repudiation of this critique reasserting the need for critical urban scholarship and demonstrating the fundamental importance of urban studies

for understanding and changing contemporary social life Contributors to the volume identify an orthodox perspective in the field subject it to critique and map out a future research agenda for the field The result is a series of inventive essays pointing scholars and students to the major theoretical and policy challenges facing urbanists and other critical social scientists

Balanced, Sustainable And Competitiveness Enhancement Study For Vietnam: A Critical Evaluation With Development Potentials Tien Loc Vu, Khee Giap Tan, Trieu Duong Luu Nguyen, Duy Nguyen, 2018-11-27 Drawing on the studies by the Asia Competitiveness Institute ACI at the Lee Kuan Yew School of Public Policy LKYSPP National University of Singapore NUS this book titled *Balanced Sustainable and Competitiveness Enhancement Study for Vietnam A Critical Evaluation with Development Potentials* which is a joint research collaboration between the National Research Project on Improving Vietnam's Competitiveness and ACI LKYSPP NUS provides a detailed assessment of the Vietnamese economy We contend that Vietnam is at a critical juncture in its development whereby a new wave of far reaching reforms is required to address persistent structural weaknesses and unleash the country's economic potentials In addition Vietnam's new growth model must tackle widening regional disparities which puts Vietnam at risk of becoming one country with two economies where the southern region of Vietnam pulls too far ahead of its northern and central counterparts Based on our analysis we propose a comprehensive policy roadmap for Vietnam to achieve balanced and sustainable development for enhanced competitiveness The successful completion of this reform agenda will set Vietnam firmly on a dynamic growth path which will allow the country to catch up with the more advanced ASEAN member states by 2040
