Creative Construing Jörn W. Scheer, Kenneth W. Sewell, 2006 The Psychology of Personal Constructs as devised by the American psychologist George Kelly stresses the importance of the meanings that individuals attach to persons and events in the world surrounding them Originating in clinical psychology it has increasingly attracted the interest of scholars and practitioners working in education in organisations and in other disciplines working with people As there are hardly more personal processes than creative ones it seems appropriate to look at the arts from a personal construct psychology perspective This book presents for the first time analyses of creative processes but it features also personal accounts by creative people who write sing dance act and make music

Feedback David Joselit, 2007 In a world where politics is conducted through images the tools of art history can be used to challenge the privatized antidemocratic sphere of American television American television embodies a paradox it is a privately owned and operated public communications network that most citizens are unable to participate in except as passive specators Television creates an image of community while preventing the formation of actual social ties because behind its simulated exchange of opinions lies a highly centralized corporate structure that is profoundly antidemocratic In Feedback David Joselit describes the privatized public sphere of television and recounts the tactics developed by artists and media activists in the 1960s and 1970s to break open its closed circuit The figures whose work Joselit examines among them Nam June Paik Dan Graham Joan Jonas Abbie Hoffman Andy Warhol and Melvin Van Peebles staged political interventions within television s closed circuit Joselit identifies three kinds of image events feedback which can be both disabling noise and rational response as when Abbie Hoffman hijacked television time for the Yippies with flamboyant stunts directed to the media the image virus which proliferates parasitically invading transforming and even blocking systems as in Nam June Paik s synthesized videotapes and installations and the avatar a quasi fictional form of identity available to anyone which can function as a political actor as in Melvin Van Peebles s invention of Sweet Sweetback an African American hero who appealed to a broad audience and influenced styles of Black Power activism These strategies writes Joselit remain valuable today in a world where the overlapping information circuits of television and the Internet offer different opportunities for democratic participation In Feedback Joselit analyzes such midcentury image events using the procedures and categories of art history

The trope of figure ground reversal for instance is used to assess acts of representation in a variety of media including the medium of politics In a televisual world Joselit argues where democracy is conducted through images art history has the capacity to become a political science

Television Sitcom Brett Mills,2005-11-17 Despite its global reach longstanding popularity and immense profitability sitcom has been repeatedly neglected in theoretical work on television and media This book demonstrates that this lack needs to be sorely addressed by dragging analysis of sitcom up to date with a wealth of contemporary examples a range of new approaches to the genre and examination of the roles sitcom and comedy play within society The book takes as its starting point the variety of ways in which sitcom has traditionally been explored A chapter on genre examines the history and development of sitcom and the institutional structures which produce it There is also analysis of differences between

sitcoms produced in a range of countries and what happens when a programme gets sold abroad and remade A chapter on representation explores the debates about the ways in which sitcom chooses who to make jokes about and why and whether this matters And a chapter on performance argues that this is a vital and underexplored aspect of sitcom s funniness and interrogates the ways in which comic actors make their performance funny With specific case studies on Will and Grace The Office and The Cosby Show as well as analysis of a broad range of contemporary and historical examples throughout this book will be of interest to students of sitcom and comedy as well as those of television and popular culture
