have appeared in rice paddies and cornfields in pine forests and mountain snow They are complex works of art on a grand scale yet these mysterious circles are thought to be a hoax But who could have created 3 000 complicated designs all over the world without leaving behind even one careless footprint This book explores what is known about crop circles and provides a compelling argument for taking them seriously *Crop Circles* iMinds,2009 Crop circles are geometric patterns found in agricultural fields most often in Southern England They consist of flattened plant stems lying in regular patterns some of which are highly complex Crop circles usually appear in fields of wheat barley canola and other common crops Circles have also been known to appear in grass sand and ice Because of their size hundreds of feet across crop circles can only be truly appreciated from the air There are at least 10 000 reported instances of crop circles to date The New Circlemakers Andrew Collins,2009-03 What is the mystery of the crop circles Are they manmade or supernatural Today the majestic crop formations grace the very same pastures of southern England that in the past were the haunts of fairies hobgoblins and mysterious lights Here too are some of Britain s most spectacular prehistoric landscapes Stonehenge Avebury and Silbury Hill all act as ominous backdrops to the crop circle phenomenon Did our ancestors know something about this beguiling enchanting landscape that we are only now waking up to for the first time Is there a higher intelligence responsible for such creations and if so who are they and what are they trying to tell us Bizarrely the answer might lie not here on earth but 37 000 light years away in the constellation of Cygnus the Northern Cross where lurks a star perhaps responsible not only for the foundation of the world s earliest stone monuments but for the emergence of humanity itself
