Return of the Gar Mark Spitzer, 2015-03-15 The alligator gar belongs to a family of fish that has remained fundamentally unchanged since the Cretaceous over 100 million years ago Its intimidating size and plethora of teeth have made it demonized throughout its range in North America resulting in needless killing Massive oil spills in its breeding range have not helped its population either Interspersing science folklore history and action packed fishing narratives Spitzer s empathy for and fascination with this air breathing armored fish provides for an entertaining odyssey that examines management efforts to preserve and propagate the alligator gar in the United States Spitzer also travels to Central America Thailand and Mexico to assess the global gar situation He reflects on what is and isn t working in compromised environments then makes a case for conservation based on personal experience and a love for wildness for its own sake This colorful portrait of the alligator gar can serve as a metaphor and measurement for the future of our biodiversity during a time of planetary crisis
