Speaking for Ourselves Julian Agyeman, Peter Cole, Randolph Haluza-DeLay, Pat O'Riley, 2010-01-01 The concept of environmental justice has evolved over the past two decades to offer a new direction for social movements public policy and public planning Researchers worldwide now position social equity as a building block for sustainability Yet the relationship between social equity and the environmental aspects of sustainability has been little studied in Canada Speaking for Ourselves draws together scholars and activists Aboriginal and non Aboriginal established and new who bring equity issues to the forefront by considering environmental justice in specifically Canadian cases and contexts and from a variety of perspectives and concerns including those of women and First Nations

Cleaner, Greener, Healthier David R. Boyd, 2015-09-01 Despite Canada's enduring image as a natural paradise every year thousands of Canadians become ill or die prematurely as a result of exposure to environmental hazards Canadians understand that their health is inextricably linked to the health of the environment and are deeply concerned about the impacts of toxic substances on themselves and their children In Cleaner Greener Healthier David R Boyd sets out to remedy Canada's environmental health problems He

begins by assessing the environmental burden of disease identifies its unequal distribution along racial and socio economic lines and estimates the associated economic costs He then compares Canadian environmental laws and policies with those in the United States Australia and the European Union delivering a provocative diagnosis of the root causes of Canada s second rate standards Finally drawing on strategies that protect citizens in other countries Boyd prescribes legal remedies that will enable Canada to catch up with the world s environmental leaders while delivering substantial health and economic benefits

Lines Drawn upon the Water Karl S. Hele, 2008-09-30 The First Nations who have lived in the Great Lakes watershed have been strongly influenced by the imposition of colonial and national boundaries there The essays in Lines Drawn upon the Water examine the impact of the Canadian American border on communities with reference to national efforts to enforce the boundary and the determination of local groups to pursue their interests and define themselves Although both governments regard the border as clearly defined local communities continue to contest the artificial divisions imposed by the international boundary and define spatial and human relationships in the borderlands in their own terms The debate is often cast in terms of Canada s failure to recognize the 1794 Jay Treaty s confirmation of Native rights to transport goods into Canada but ultimately the issue concerns the larger struggle of First Nations to force recognition of their people s rights to move freely across the border in search of economic and social independence

Where the Waters Divide Michael Mascarenhas, 2012-07-13 This timely and important scholarship advances an empirical understanding of Canada s contemporary Indian problem Where the Waters Divide is one of the few book monographs that analyze how contemporary neoliberal reforms in the manner of de regulation austerity measures common sense policies privatization etc are woven through and shape contemporary racial inequality in Canadian society Using recent controversies in drinking water contamination and solid waste and sewage pollution Where the Waters Divide illustrates in concrete ways how cherished notions of liberalism and common sense reform neoliberalism also constitute a particular form of racial oppression and white privilege Where the Waters Divide brings together theories and concepts from four disciplines sociology geography Aboriginal studies and environmental studies to build critical insights into the race relational aspects of neoliberal reform In particular the book argues that neoliberalism represents a key moment in time for the racial formation in Canada one that functions not through overt forms of state sanctioned racism as in the past but via the morality of the marketplace and the primacy of individual solutions to modern environmental and social problems Furthermore Mascarenhas argues because most Canadians are not aware of this pattern of laissez faire racism and because racism continues to be associated with intentional and hostile acts Canadians can dissociate themselves from this form of economic racism all the while ignoring their investment in white privilege Where the Waters Divide stands at a provocative crossroads Disciplinarily it is where the social construction of water an emerging theme within Cultural Studies and Environmental Sociology meets the social construction of expertise one of the most contentious areas within the social sciences It is also where the political economy of

natural resources an emerging theme in Development and Globalization Studies meets the Politics of Race Relations an often understudied area within Environmental Studies Conceptually the book stands where the racial formation associated with natural resources reform is made and re made and where the dominant form of white privilege is contrasted with anti neoliberal social movements in Canada and across the globe

Applied Anthropology in Canada Edward J. Hecican, 2008-07-30 Anthropologists are often reluctant to present their work relating to matters of a broad social context to the wider public even though many have much to say about a range of contemporary issues In this second edition of a classic work in the field Edward J Hecican takes stock of Anthropology's research on current indigenous affairs and offers an up to date assessment of Aboriginal issues in Canada from the perspective of applied Anthropology In his central thesis Hecican underlines Anthropology's opportunity to make a significant impact on the way Aboriginal issues are studied perceived and interpreted in Canada He contends that anthropologists must quit lingering on the periphery of debates concerning land claims and race relations and become more actively committed to the public good His study ranges over such challenging topics as advocacy roles in Aboriginal studies the ethics of applied research policy issues in community development the political context of the self government debate and the dilemma of Aboriginal status and identity in Canada *Applied Anthropology in Canada* is an impassioned call for a revitalized Anthropology one more directly attuned to the practical problems faced by First Nations peoples Hecican's focus on Aboriginal issues gives his work a strong contemporary relevance that bridges the gap between scholarly and public spheres
