The Construction of New Mathematical Knowledge in Classroom Interaction Heinz Steinbring, 2006-03-30 Mathematics is generally considered as the only science where knowledge is uniform universal and free from contradictions Mathematics is a social product a net of norms as Wittgenstein writes In contrast to other institutions traffic rules legal systems or table manners which are often internally contradictory and are hardly ever unrestrictedly accepted mathematics is distinguished by coherence and consensus Although mathematics is presumably the discipline which is the most differentiated internally the corpus of mathematical knowledge constitutes a coherent whole The consistency of mathematics cannot be proved yet so far no contradictions were found that would question the uniformity of mathematics Heintz 2000 p 11 The coherence of mathematical knowledge is closely related to the kind of professional communication that research mathematicians hold about mathematical knowledge In an extensive study Bettina Heintz Heintz 2000 proposed that the historical development of formal mathematical proof was in fact a means of establishing a communicable code of conduct which helped mathematicians make themselves understood in relation to the truth of mathematical statements in a coordinated and unequivocal way

Television Introductions Vincent Terrace, 2013-11-07 Since the beginning of network television many shows have been preceded by an announcement or theme song that served various purposes In the 1950s and 60s it was common for announcers to declare that a program had been brought to you by a sponsor who paid for the privilege of introducing a show Other programs such as *The Twilight Zone* *Star Trek* and *The Odd Couple* provided a brief encapsulation of the show's subject matter a practice that has continued for recent shows like *Alias* *Battlestar Galactica* *Person of Interest* and the various editions of *Law Order* In *Television Introductions* Narrated TV Program Openings since 1949 Vincent Terrace has assembled openings for more than nine hundred television shows from the past seven decades The only documented history of narrated television program introductions this volume is arranged by type of programming such as comedy drama Western game show soap opera and children's show In addition to quoting the opening material entries provide information about each show's network history and years of broadcast Many entries include descriptions of the show the names of announcers and a list of main cast members as well as a sponsor pitch exactly as spoken Openings for programs with multiple introductions like *The Adventures of Ozzie and Harriet* and *Charlie's Angels* are also included For programs that featured new guest stars every episode such as game shows and variety programs Terrace has selected a representative introduction In addition to the theme song credits found in the main text there are also appendixes of theme songs and their composers and or singers as well as a listing of commercial releases on DVD VHS CD and LP of shows and their soundtracks A comprehensive resource for researchers and pop culture aficionados alike *Television Introductions* provides a fascinating look at this neglected part of TV history
