Chappie J. Alfred Phelps, 1992 James inspiring life from his days as a pioneering Tuskegee airman to the stratosphere of command of NORAD

Airmen and Air Theory Phillip S. Meilinger, 2001 This part of the book reviews the state of American airpower biography and autobiography I have set certain parameters to define the boundaries of my discussion I discuss biographies and autobiographies anthologies and oral histories of military officers who served in senior positions Thus although the stories of great aviators like Eddie Rickenbacker Charles Lindbergh and Chuck Yeager are important those men did not command large forces either in combat or in peace they had only a temporary effect on the development of strategy and doctrine Similarly excluded are civilian political leaders and industrialists like Stuart Symington and Donald Douglas even though they played key roles In their own spheres What follows are the stories some published some not of America s greatest military airmen some told by themselves others by biographers The order of presentation is roughly chronological according to the time during which these men served The fact that a surprising number of air luminaries do not appear here means that much work remains to be done
