National Infrastructure Advisory Council Intelligence Information Sharing Final Report and Recommendations ,
Executive Summary The National Infrastructure Advisory Council NIAC set out to determine whether the right people are receiving the right intelligence information at the right time to support robust protection and resilience of the Nation's critical infrastructure More than 200 interviews and extensive open source research uncovered a wealth of insights on this complex problem First there have been marked improvements in the sharing of intelligence information within the Federal Intelligence Community and between the Federal Government and regions States and municipalities However this level of improvement has not been matched in the sharing of intelligence information between the Federal Government and private sector owners and operators of critical infrastructure Despite some notable successes this bi-directional sharing is still relatively immature leaving a large gap between current practices and an optimal system of effective public private intelligence information sharing We observe that trust is the essential glue to make this public private system work Trust results when partner capabilities are understood and valued processes are tailored to leverage these capabilities and these processes are tested and proven valuable to all partners When breakdowns in information sharing occur it erodes trust and is counterproductive to risk management Information sharing is perhaps the most important factor in the protection and resilience of critical infrastructure Information on threats to infrastructure and their likely impact underlies nearly every security decision made by owners and operators including which assets to protect how to make operations more resilient how to plan for potential disasters when to ramp up to higher levels of security and how to respond in the immediate aftermath of a disaster We looked at intelligence information flowing from the Federal Government to critical infrastructure owners and operators as well as risk information flowing from critical infrastructure owners and operators to the government Our study reveals the complex ways information is gathered analyzed packaged and shared among government and the owners and operators of critical infrastructures In tackling this complex subject we examined the different stages of the intelligence cycle including requirements generation information collection analysis and dissemination To gather a variety of perspectives we conducted extensive interviews with security directors chief executives subject matter experts and government executives and managers Recognizing that distinct sector characteristics shape information sharing needs we conducted case studies of five sectors Commercial Facilities Healthcare and Public Health Energy Oil and Natural Gas Banking and Finance and Chemical While we found some information sharing approaches to be effective others were not As a result we adopted a capability maturity approach which acknowledges that different Federal agencies have different abilities to share information effectively and we sought to build on what is working **Intelligence Report** ,2009 The Nationwide Drive Against Law Enforcement Intelligence Operations United States. Investigate the Administration of the Internal Security Act and Other Internal Security Laws,1975 **Madame Fourcade's Secret War** Lynne Olson,2019-03-05 NEW YORK TIMES BESTSELLER The little known true story of Marie Madeleine Fourcade the woman who headed the largest spy network in occupied France during World War II from the bestselling author of Citizens of London and Last Hope Island Brava to Lynne Olson for a biography that should challenge any outdated assumptions about who deserves to be called a hero The Washington Post NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR AND THE WASHINGTON POST In 1941 a thirty one year old Frenchwoman a young mother born to privilege and known for her beauty and glamour became the leader of a vast intelligence organization the only woman to serve as a chef de resistance during the war Strong willed independent and a lifelong rebel against her country s conservative patriarchal society Marie Madeleine Fourcade was temperamentally made for the job Her group s name was Alliance but the Gestapo dubbed it Noah s Ark because its agents used the names of animals as their aliases The name Marie Madeleine chose for herself was Hedgehog a tough little animal unthreatening in appearance that as a colleague of hers put it even a lion would hesitate to bite No other French spy network lasted as long or supplied as much crucial intelligence including providing American and British military commanders with a 55 foot long map of the beaches and roads on which the Allies would land on D Day as Alliance The Gestapo pursued them relentlessly capturing torturing and executing hundreds of its three thousand agents including Fourcade s own lover and many of her key spies Although Fourcade the mother of two young children moved her headquarters every few weeks constantly changing her hair color clothing and identity she was captured twice by the Nazis Both times she managed to escape once by slipping naked through the bars of her jail cell and continued to hold her network together even as it repeatedly threatened to crumble around her Now in this dramatic account of the war that split France in two and forced its people to live side by side with their hated German occupiers Lynne Olson tells the fascinating story of a woman who stood up for her nation her fellow citizens and herself Fast paced and impressively researched Olson writes with verve and a historian s authority With this gripping tale Lynne Olson pays Marie Madeleine Fourcade what history has so far denied her France slow to confront the stain of Vichy would do well to finally honor a fighter most of us would want in our foxhole The New York Times Book Review **Daily Intelligence** ,1921 [A Guide to U.S. Military Intelligence Reports](#) Dale Reynolds,1985 **Turkish Intelligence and the Cold War** Egemen Bezci,2019-10-31 Turkish Intelligence and the Cold War examines the hitherto unexplored history of secret intelligence cooperation between three asymmetric partners specifically the UK US and Turkey from the end of the Second World War until the Turkey s first military coup d tat on 27 May 1960 The book shows that our understanding of the Cold War as a binary rivalry between the two blocs is too simple an approach and obscures important characteristics of intelligence cooperation among allies Egemen Bezci shows that a pragmatic approach offers states new opportunities to protect national interests by conducting intelligence diplomacy to influence crucial areas such as nuclear weapons and to exploit cooperation

in support of their own strategic imperatives This study not only reveals previously unexplored origins of secret intelligence cooperation between Turkey and West but also contributes to wider academic debates on the nature of the Cold War by highlighting the potential agency of weaker states in the Western Alliance **Daily Intelligence** International Labour Office, International Labour Organization, 1921 **Intelligence Report** United States.
