Insights from Filmmaking for Analyzing Biblical Narrative Gary Yamasaki, 2016-10-01 In this volume Gary Yamasaki develops an innovative approach to biblical narrative exploring the way stories are treated in filmmaking and using that as a model for analyzing biblical stories In our culture the voluminous exposure we have to movies has resulted in our being conditioned to experience cinematic stories in a particular manner for example seeing them as events rather than objects and the story worlds of movies as distinct from the real world However biblical stories are not typically viewed through this cinematic story lens making our analysis of biblical narrative out of step with what has become our natural mode of experiencing stories This book demonstrates how fresh interpretive insights emerge when we read biblical stories like we watch movies Each volume in the new Insights series discusses discoveries and insights gained into biblical texts from a particular approach or perspective in current scholarship Accessible and appealing to today's students each Insight volume will discuss 1 how this method approach or strategy was first developed and how its application has changed over time 2 what current questions arise from its use 3 what enduring insights it has produced and 4 what questions remain for future scholarship

Crash Course in Basic Cataloging with RDA Heather Lea Moulaison, Raegan Wiechert Assistant Professor, 2015-10-01 Covering tools terminology and the FRBR based RDA approach to description this book explains the current principles of organization of information and basic cataloging practices for non catalogers enabling readers to understand elements of the cataloging process and interact with records in a basic manner Organization of information and cataloging is often the most daunting task for library technicians and non catalogers working in the library New RDA cataloging rules can be baffling for even the more seasoned catalogers Written by two authors with 20 years combined experience in cataloging instruction Crash Course in Basic Cataloging with RDA approaches current principles of organization of information and cataloging practices from a basic standpoint for non catalogers It makes a complex topic easy to understand and a complicated practice doable for those without the proper training and necessary experience The book gives readers a basic understanding of organization of information and cataloging practice explaining how records are created and the approaches to different formats of information in libraries including MARC records and encoding RDA cataloging records offering assistance in applying RDA identifying the cataloger's tools and providing non technical explanations for the tasks that today's catalogers do It contains an introduction a bibliography webliography and three appendices of additional resources Cataloging Tools Resources for Catalogers and Sample Catalog Records
