Cybernetics and the Management of Large Systems American Society for Cybernetics,1969 *Cybernetics and the Management of Large Systems* American Society For Cybernetics,1969 Cybernetics and the management of large systems Edmond M. Dewan,1925 *Cybernetics and the Management of Large Systems; Proceedings of the Second Annual Symposium. Edited by Edmond M. Dewan* American Society for Cybernetics, Cybernetics and the Management of Large Systems Edmond M. Dewan, **Cybernetics and the Management of Large Systems** E.M. Dewan,American Society for Cybernetics,1969 **The Cybernetics Moment** Ronald R. Kline,2015-07-15 How did cybernetics and information theory arise and how did they come to dominate fields as diverse as engineering biology and the social sciences Winner of the CHOICE Outstanding Academic Title of the Choice ACRL Outstanding Academic Title Choice Cybernetics the science of communication and control as it applies to machines and to humans originates from efforts during World War II to build automatic anti-aircraft systems Following the war this science extended beyond military needs to examine all systems that rely on information and feedback from the level of the cell to that of society In *The Cybernetics Moment* Ronald R Kline a senior historian of technology examines the intellectual and cultural history of cybernetics and information theory whose language of information feedback and control transformed the idiom of the sciences hastened the development of information technologies and laid the conceptual foundation for what we now call the Information Age Kline argues that for about twenty years after 1950 the growth of cybernetics and information theory and ever more powerful computers produced a utopian information narrative an enthusiasm for information science that influenced natural scientists social scientists engineers humanists policymakers public intellectuals and journalists all of whom struggled to come to grips with new relationships between humans and intelligent machines Kline traces the relationship between the invention of computers and communication systems and the rise decline and transformation of cybernetics by analyzing the lives and work of such notables as Norbert Wiener Claude Shannon Warren McCulloch Margaret Mead Gregory Bateson and Herbert Simon Ultimately he reveals the crucial role played by the cybernetics moment when cybernetics and information theory were seen as universal sciences in setting the stage for our current preoccupation with information technologies **Cybernetics in Electric Power Systems** Valentin Andreevich Venikov,1978 **Agricultural Cybernetics** Yanbo Huang,Qin Zhang,2021-08-17 Agricultural systems are uniquely complex systems given that agricultural systems are parts of natural and ecological systems Those aspects bring in a substantial degree of uncertainty in system operation Also impact factors such as weather factors are critical in agricultural systems but these factors are uncontrollable in system management Modern agriculture has been evolving through precision agriculture beginning in the late 1980s and biotechnological innovations in the early 2000s Precision agriculture implements site specific crop production management by integrating agricultural mechanization and information technology in geographic information system GIS global navigation satellite

system GNSS and remote sensing Now precision agriculture is set to evolve into smart agriculture with advanced systematization informatization intelligence and automation From precision agriculture to smart agriculture there is a substantial amount of specific control and communication problems that have been investigated and will continue to be studied In this book the core ideas and methods from control problems in agricultural production systems are extracted and a system view of agricultural production is formulated for the analysis and design of management strategies to control and optimize agricultural production systems while exploiting the intrinsic feedback information exchanging mechanisms On this basis the theoretical framework of agricultural cybernetics is established to predict and control the behavior of agricultural production systems through control theory

Current Topics in Cybernetics and Systems J. Rose,2012-12-06 This book is a record of the contents of the papers accepted by the Congress Committee for presentation at the Fourth International Congress of Cybernetics and Systems Amsterdam The Netherlands 21 25 August 1978 Two hundred and forty five papers from authors from thirty three countries of all the five continents are included The papers are presented in an abridged form in order to highlight the main themes and produce a book that is both readable and relatively inexpensive It was felt that after the publication of the weighty and rather costly form of the Proceedings of the Third International Congress of Cybernetics and Systems held in Bucharest Romania in 1975 Modern Trends in Cybernetics and Systems eds Rose and Bilciu W O G S c and Springer Verlag 1977 3 volumes about 3500 pages 150 an abridged but comprehensive version would be more acceptable to readers It is worth noting that the full names and addresses of authors are given for each paper and requests to authors for more information and even full scale papers would produce a positive response As a matter of interest each paper carries in addition brief summaries The papers are arranged in each section or symposium in the alphabetical order of authors names this is not necessarily the order of presentation at the Congress
