## **Cyborg Babies From Techno Sex To Techno Tots:**

**Cyborg Babies** Robbie Davis-Floyd, Joseph Dumit, 2013-08-21 From fetuses scanned ultrasonically to computer hackers in daycare contemporary children are increasingly rendered cyborg by their immersion in technoculture As we are faced with reproductive choices connected directly with technologies we often have trouble gaining perspective on our own cultural co dependency with these very same technologies Our notions of fetal health maternal risk and child IQ are inseparable from them *Cyborg Babies* tracks the process of reproducing children in symbiosis with pervasive technology and offers a range of perspectives from resistance to ethnographic analysis to science fiction Cultural anthropologists and social critics offer cutting edge ethnographies critiques and personal narratives of cyborg conceptions sperm banks IVF surrogacy and prenatal mis diagnosis DES ultrasound amniocentesis the technological de and reconstruction of birth in the hospital electronic fetal monitors epidurals and the effects of computer simulation games and cyborg toys and stories on children s emergent consciousness Contributors include Janet Isaacs Ashford Elizabeth Cartwright David Chamberlain Jennifer Croissant Charis M Cussins Robbie Davis Floyd Joseph Dumit Eugenia Georges Anne Hill Mizuko Ito Emily Martin Steven Daniel Mentor Janneli F Miller Lisa Mitchell Lisa Jean Moore Rayna Rapp Matthew A Schmidt Sylvia Sensiper Elizabeth Roberts and Sherry Turkle Examining the increasing cyborgification of the American child from conception through birth and beyond *Cyborg Babies* considers its implications for human cultural and psychological evolution

**Cyborg Babies** Robbie Davis-Floyd, Joseph Dumit, 1998 *Birthing Techno-Sapiens* Robbie Davis-Floyd, 2021-03-31 This ground breaking book challenges us to re think ourselves as techno sapiens a new species we are creating as we continually co evolve ourselves with our technologies While some of its chapters are imaginary they are all empirically grounded in ethnography and richly theorized from diverse disciplines The authors go far beyond a techno optimism vs techno pessimism stance stretching our thinking about birthing techno sapiens to consider not only how our cyborgian reproductive lives are constrained and or enabled by technology but are also about emotions and spirit The world of reproductive health care and particularly that of genetic engineering is developing exponentially and current challenges are vastly different from those of a decade ago The book is provocative intended to generate debate ideas and future research and to influence ethical policy and practice in human techno reproduction It will be of interest across the social sciences and humanities for reproductive scholars bioethicists techno scientists and those involved in the development and delivery of maternity services **Reproductive**

**Agency, Medicine and the State** Maya Unnithan-Kumar, 2005-11 Recent years have seen many changes in human reproduction resulting from state and medical interventions in childbearing processes Based on empirical work in a variety of societies and countries this volume considers the relationship between reproductive processes of fertility pregnancy childbirth and the postpartum period on the one hand and attitudes medical technologies and state health policies in diverse cultural contexts on the other **Parenting for Peace** Marcy Axness, 2012-01-30 If we really want to change the world let s

raise a generation hardwired for peace and innovation Marcy Axness details a unique seven step seven principle matrix for helping children achieve self regulation self reflection trust and empathy These qualities are the result of dynamic interactions between genetics and environment beginning before the child is even born foundations for this level of health begin forming during the prenatal period and some aspects of optimal development are influenced as early as conception

*Biodynamic Craniosacral Therapy, Volume Three* Michael J. Shea, Ph.D.,2010-11-30 Dr Michael J Shea s series on Biodynamic Craniosacral Therapy is based on healthcare providers physically sensing love and accessing a deep sense of warmth and stillness in the heart He begins this third volume by emphasizing the therapeutic application of touch therapy skills As in the previous two books he teaches these skills by explaining the importance of practitioners being able to perceive Primary Respiration a slow rhythmic tidal movement in the fluids of the body He goes on to discuss the distinctive influence of human embryology on any therapeutic modality A number of other experts in the field contribute chapters that illuminate the spiritual and psychological dimensions of human embryonic development especially the heart Dr Shea offers valuable new skills for anyone from midwives to pediatricians working therapeutically with infants In addition he summarizes current thinking on infant brain development discusses the long term consequences of attachment issues between the mother and infant and explores the importance of understanding the similarities of the mother infant and the therapistpatient relationships

Techno-sexual Landscapes Ángel J. Gordo-López,Richard Cleminson,2004 At first sight to ask how sex has been influenced by technology over time may appear to be a perplexing question There is no doubt about the current importance of the new technologies of reproduction sex change operations and the passion that electronic chat rooms incite However it might be argued that this is a recent phenomenon and the past has little to reveal about techno sexual relations This book draws on a number of examples of productive relations between technology and sexuality the technical and sexual organization of medieval monasteries the moral and erotic transgression afforded by the early wind and water mill and the romances forged in the context of the train The authors focus on three main eras the medieval period around the eleventh century with its monasteries as sites of technical innovation and heretical religious movements on the borders of Christianity early modernity from the time of the European discoveries and the creation of others including the natives of South America and the witch and the present and the technologically mediated future What might be the connection between mills navigation techniques and trains and the realm of sexuality How does the government of sexuality and socio economic relations in the sixteenth century across distances find resonance in cyberspace Once the question of technology and sexuality has been placed in a long term perspective the reader is invited to reconsider relations often brushed aside or devalued for their connection with low popular or quotidian culture practices and spaces Acknowledging the uncomfortable social fact of techno sexuality as a quotidian experience allows us to recuperate a range of often discounted or forgotten social actors movements and landscapes
