Cycles Transfers And Motivic Homology Theories:

Cycles, Transfers, and Motivic Homology Theories Vladimir Voevodsky, Andrei Suslin, Eric M. Friedlander, 2011-11-12 The original goal that ultimately led to this volume was the construction of motivic cohomology theory whose existence was conjectured by A Beilinson and S Lichtenbaum This is achieved in the book s fourth paper using results of the other papers whose additional role is to contribute to our understanding of various properties of algebraic cycles The material presented provides the foundations for the recent proof of the celebrated Milnor Conjecture by Vladimir Voevodsky The theory of sheaves of relative cycles is developed in the first paper of this volume The theory of presheaves with transfers and more specifically homotopy invariant presheaves with transfers is the main theme of the second paper The Friedlander Lawson moving lemma for families of algebraic cycles appears in the third paper in which a bivariant theory called bivariant cycle cohomology is constructed The fifth and last paper in the volume gives a proof of the fact that bivariant cycle cohomology groups are canonically isomorphic in appropriate cases to Bloch s higher Chow groups thereby providing a link between the authors theory and Bloch s original approach to motivic co homology

The Arithmetic and Geometry of Algebraic Cycles B. Brent Gordon, James D. Lewis, Stefan Müller-Stach, Shuji Saito, Noriko Yui, 2012-12-06 The NATO Advanced Study Institute on The Arithmetic and Geometry of Algebraic Cycles was held at the Banff Centre for Conferences in Banff Alberta Canada from June 7 until June 19 1998 This meeting was organized jointly with Centre de Recherches Mathématiques CRM Montreal as one of the CRM Summer schools which take place annually at the Banff Center The conference also served as the kick off activity of the CRM 1998 99 theme year on Number Theory and Arithmetic Geometry There were 109 participants who came from 17 countries Belgium Canada China France Germany Greece India Italy Japan Mexico Netherlands mania Russia Spain Switzerland the United Kingdom and the United States During a period of two weeks 41 invited lectures and 20 contributed lectures were presented Four lectures by invited speakers were delivered every day followed by two sessions of contributed talks Many informal discussions and working sessions involving small groups were organized by individual participants In addition participants reprints and preprints were displayed through out in a lounge next to the auditorium which further enhanced opportunities for communication and interaction

Algebraic K-theory And Its Applications - Proceedings Of The School Hyman Bass, Aderemi Oluyomi Kuku, C Pedrini, 1999-03-12 The Proceedings volume is divided into two parts The first part consists of lectures given during the first two weeks devoted to a workshop featuring state of the art expositions on Overview of Algebraic K theory including various constructions examples and illustrations from algebra number theory algebraic topology and algebraic differential geometry as well as on more concentrated topics involving connections of K theory with Galois etale cyclic and motivic co homologies values of zeta functions and Arithmetics of Chow groups and zero cycles The second part consists of research papers arising from the symposium lectures in the third week

Motives and Algebraic Cycles Rob de Jeu, James Dominic Lewis, 2009 Spencer J

Bloch has and continues to have a profound influence on the subject of Algebraic K Theory Cycles and Motives This book which is comprised of a number of independent research articles written by leading experts in the field is dedicated in his honour and gives a snapshot of the current and evolving nature of the subject Some of the articles are written in an expository style providing a perspective on the current state of the subject to those wishing to learn more about it Others are more technical representing new developments and making them especially interesting to researchers for keeping abreast of recent progress

Fields Medallists' Lectures, 2nd Edition Michael Atiyah, Daniel Iagolnitzer, 2003-11-03 Although the Fields Medal does not have the same public recognition as the Nobel Prizes they share a similar intellectual standing It is restricted to one field that of mathematics and an age limit of 40 has become an accepted tradition Mathematics has in the main been interpreted as pure mathematics and this is not so unreasonable since major contributions in some applied areas can be and have been recognized with Nobel Prizes A list of Fields Medallists and their contributions provides a bird s eye view of mathematics over the past 60 years It highlights the areas in which at various times greatest progress has been made This volume does not pretend to be comprehensive nor is it a historical document On the other hand it presents contributions from Fields Medallists and so provides a highly interesting and varied picture The second edition of Fields Medallists Lectures features additional contributions from the following Medallists Kunihiko Kodaira 1954 Richard E Borcherds 1998 William T Gowers 1998 Maxim Kontsevich 1998 Curtis T McMullen 1998 and Vladimir Voevodsky 2002

Fields Medallists' Lectures Daniel Iagolnitzer, 2003 Although the Fields Medal does not have the same public recognition as the Nobel Prizes they share a similar intellectual standing It is restricted to the field of mathematics and an age limit of 40 has become an accepted tradition This volume presents contributions from Fields Medallists

Algebraic K-Theory Wayne Raskind, Charles A. Weibel, 1999 This volume presents the proceedings of the Joint Summer Research Conference on Algebraic K theory held at the University of Washington in Seattle High quality surveys are written by leading experts in the field Included is an up to date account of Voevodsky s proof of the Milnor conjecture relating the Milnor K theory of fields to Galois cohomology The book is intended for graduate students and research mathematicians interested in K theory algebraic geometry and number theory
