**Macromolecules** H.G. Elias,2013-11-11 The second edition of this textbook is identical with its fourth German edition and it thus has the same goals precise definition of basic phenomena a broad survey of the whole field integrated representation of chemistry physics and technology and a balanced treatment of facts and comprehension The book thus intends to bridge the gap between the often oversimplified introductory textbooks and the highly specialized texts and monographs that cover only parts of macromolecular science The text intends to survey the whole field of macromolecular science Its organization results from the following considerations The chemical structure of macromolecular compounds should be independent of the method of synthesis at least in the ideal case Part I is thus concerned with the chemical and physical structure of polymers Properties depend on structure Solution properties are thus discussed in Part II solid state properties in Part III There are other reasons for discussing properties before synthesis For example it is difficult to understand equilibrium polymerization without knowledge of solution thermodynamics the gel effect without knowledge of the glass transition temperature etc Part IV treats the principles of macromolecular syntheses and reactions

**Cyclopolymerization and Cyclocopolymerization** George Butler,2020-12-17 This broadly based work gathers the vast bulk of information published on cyclopolymerization since its discovery including the symmetrical diene counterparts of all classical monomers that can undergo addition polymerization all unsymmetrical dienes and cyclopolymerizable monomers such as dialdehydes diynes diisocyanates diepoxides dinitriles and some organometallic monomers Providing access to contemporary knowledge in the field and offering discussions of interest to a wide variety of polymer scientists *Cyclopolymerization and Cyclocopolymerization* delineates theory summarizes polymerization procedures furnishes theoretical justification for mechanistic proposals details commercial applications and describes new monomer syntheses Supplying over 2700 references as well as chemical abstract citations

*Cyclopolymerization and Cyclocopolymerization* is a resource which should be of practical value to polymer academic
