Most of what we know about Leonardo da Vinci we know because of his notebooks. Some 6 000 sheets of notes and drawings survive which represent perhaps one fifth of what he actually produced. In them he recorded everything that interested him in the world around him and his study of how things work. With an artist's eye and a scientist's curiosity he studied the movement of water and the formation of rocks, the nature of flight and optics, anatomy, architecture, sculpture and painting. He jotted down fables and letters and developed his belief in the sublime unity of nature and man. Through his notebooks we can get an insight into Leonardo's thoughts and his approach to work and life. *Leonardo Da Vinci's Notebooks* Leonardo (da Vinci),1910

This is in spite of the fact that we have an unparalleled set of documents which illuminate his thought processes, interests and deepest beliefs. We have access to hundreds of pages of his notes, jottings, sketches, doodles and musings including lists of books he read and even scraps of financial records. All of the known Da Vinci papers as of the mid 19th century are included here in this magnificent collection. What emerges is the picture of a rationalist. For instance Da Vinci was one of the first to question the Biblical account of the Flood. He saw the fossils of sea creatures on the tops of mountains and concluded that these could not have been deposited in a forty day flood.
